0. Preliminaries	8
0.1. Topology and Groups	8
0.1.1. Topological Spaces	8
0.1.2. Sheaves and Pre-Sheaves	9
0.1.3. Manifolds	11
0.1.4. Topological Groups	12
0.1.5. LIE Groups	16
0.2. Locally Convex Spaces and Differentiability	19
0.2.1. Locally Convex Spaces	19
0.2.2. Vector Valued Functions of Real Variables	22
0.2.3. Differentiability on Locally Convex Spaces	23
0.3. Locally Convex Algebras	25
1. Differentiability on Topological Groups	26
1.1. Axiomatic Approach to Differentiability	27
1.1.1. Axioms for Sheaves of Differentiable Mappings	27
1.1.2. Examples and Consequences with Respect to One-Parameter Subgroups	29
1.2. Differentiability of Vector Valued Functions on Topological Groups	30
1.2.1. w -Continuously Differentiable Functions	30
1.2.2. c -Continuously Differentiable Functions	34
1.3. Differentiability of Mappings	38
1.3.1. Pre-LIE Groups	38
1.3.2. c -Continuously Differentiable Mappings between Pre-LIE Groups	42
2. Analysis on Locally Compact Topological Groups	47
2.1. LIE Theory of Locally Compact Groups	48
2.1.1. LP-Groups and LP-LIE Algebras	48
2.1.2. Locally Compact Groups and their LIE Algebras	55

2.2. Differentiable Functions on Locally Compact Groups	61
2.2.1. A simplified Notion of Differentiability	61
2.2.2. Locally Cylindrical Functions	63
2.2.3. The Function Spaces $\mathcal{F}(G)$ and $\mathcal{F}_{\text{cyl}}(G)$	69
3. AE-Algebras and Power Series. The CH-Series	74
3.1. AE-Algebras	75
3.1.1. Definition and Basic Properties	75
3.1.2. Examples of AE-Algebras	77
3.2. Power Series in AE-Algebras	81
3.2.1. Convergence Properties	81
3.2.2. Smoothness of Mappings defined by Power Series	83
3.2.3. Composition of Power Series	85
3.3. Power Series in Associative AE-Algebras	88
3.3.1. Mappings defined by Holomorphic Functions	88
3.3.2. LIE Products in Associative AE-Algebras	90
3.3.3. The CH-Formula in an Associative AE-Algebra	91
3.4. The CH-Series in an AE-LIE Algebra	93
3.4.1. Convergence of the CH-Series	93
3.4.2. Local Convexity as a Group Property	96
4. General LIE Theory	98
4.1. LIE Groups	99
4.1.1. Basic Definitions	99
4.1.2. Homomorphisms and Subgroups	107
4.2. Current Algebras and Current Groups	111
4.2.1. Γ -Rapidly Decreasing Functions	111
4.2.2. Γ -Rapidly Decreasing Mappings	117
4.2.3. Permanence Properties of Current Algebras and Groups	123
