

# Table of Contents

Preliminaries . . . . .	1
1. Lie Groups and Lie Algebras . . . . .	1
2. Algebraic Groups . . . . .	7
3. Group and Lie Algebra Cohomology . . . . .	12
4. Principal Bundles . . . . .	14
Chapter I. Generalities on Lattices . . . . .	16
Chapter II. Lattices in Nilpotent Lie Groups . . . . .	29
Chapter III. Lattices in Solvable Lie Groups . . . . .	43
Chapter IV. Polycyclic Groups and Arithmeticity of Lattices in Solvable Lie Groups . . . . .	56
Chapter V. Lattices in Semisimple Lie Groups: The Density Theorem of Borel . . . . .	78
Chapter VI. Deformations . . . . .	89
Chapter VII. Cohomology Computations. . . . .	105
1. de Rham's Theorem . . . . .	105
2. Hodge's Theory for Local Systems . . . . .	108
3. Discrete Subgroups in Lie Groups . . . . .	111
4. Solvable Lie Groups . . . . .	115
5. Semisimple Groups (Weil's Rigidity Theorem) . . . . .	123
Chapter VIII. Discrete Nilpotent Subgroups of Lie Groups . . . . .	139
Chapter IX. Lattices in Semisimple Lie Groups – A Theorem of Wang . . . . .	153
Chapter X. Arithmetic Groups: Reduction Theory in $SL(n)$ and the Compactness Criterion . . . . .	159
Chapter XI. The Results of Kazdan-Margolis. . . . .	172
Chapter XII. Semisimple Algebraic Groups (Summary of Results) . . . . .	189
Chapter XIII. Fundamental Domains . . . . .	196
Chapter XIV. Existence of Lattices . . . . .	215
Bibliography . . . . .	223
Index . . . . .	227
