Preface . . . . .	ix
1. Introduction . . . . .	1
1.1. Statement of some main results . . . . .	1
1.2. Outline of the succeeding chapters . . . . .	5
2. Moore's Ergodicity Theorem . . . . .	8
2.1. Ergodicity and smoothness . . . . .	8
2.2. Moore's theorem: statement and some consequences . . . . .	17
2.3. Unitary representations of semi-direct products, I . . . . .	23
2.4. Vanishing of matrix coefficients for semisimple groups . . . . .	28
3. Algebraic Groups and Measure Theory . . . . .	32
3.1. Review of algebraic groups . . . . .	32
3.2. Orbits of measures on projective varieties and the Borel density theorem . . . . .	38
3.3. Orbits in function spaces . . . . .	49
3.4. Rationality of measurable mappings – first results . . . . .	52
3.5. A homomorphism theorem . . . . .	56
4. Amenability . . . . .	59
4.1. Amenable groups . . . . .	59
4.2. Cocycles . . . . .	65
4.3. Amenable actions . . . . .	77
5. Rigidity . . . . .	85
5.1. Margulis' superrigidity theorem and the Mostow–Margulis rigidity theorem . . . . .	85
5.2. Rigidity and orbit equivalence of ergodic actions . . . . .	95
6. Margulis' Arithmeticity Theorems . . . . .	114
6.1. Arithmeticity in groups of real rank at least 2 . . . . .	114
6.2. The commensurability criterion . . . . .	122
7. Kazhdan's Property (T) . . . . .	130
7.1. Kazhdan's property and some consequences . . . . .	130
7.2. Amenability and unitary representations . . . . .	133
7.3. Unitary representations of semi-direct products, II . . . . .	139
7.4. Kazhdan's property for semisimple groups . . . . .	146

8. Normal Subgroups of Lattices . . . . .	149
8.1. Margulis' finiteness theorem – statement and first steps of proof . . . . .	149
8.2. Contracting automorphisms of groups . . . . .	152
8.3. Completion of the proof – equivariant measurable quotients of flag varieties . . . . .	157
9. Further Results on Ergodic Actions . . . . .	162
9.1. Cocycles and Kazhdan's property . . . . .	162
9.2. The algebraic hull of a cocycle . . . . .	166
9.3. Actions of lattices and product actions . . . . .	169
9.4. Rigidity and entropy . . . . .	175
9.5. Complements . . . . .	183
10. Generalizations to $p$ -adic groups and $S$ -arithmetic groups . . . . .	187
Appendices . . . . .	194
A. Borel spaces . . . . .	194
B. Almost everywhere identities on groups . . . . .	197
References . . . . .	202
Subject Index . . . . .	208
