

TABLE OF CONTENTS

FOREWORD	v
GLOSSARY OF SYMBOLS	ix
INTRODUCTION	3
A. INTEGRABILITY OF LIE STRUCTURES	7
EXAMPLE (1): <i>The Frobenius theorem</i>	9
EXAMPLE (2): <i>Fields of p-frames, parallelism</i>	10
EXAMPLE (3): <i>Riemannian structures</i>	11
EXAMPLE (4): <i>Linear connections</i>	11
EXAMPLE (5): <i>Canonical differential forms</i>	11
EXAMPLE (6): <i>Almost-product structure</i>	13
EXAMPLE (7): <i>Almost-complex structure</i>	15
EXAMPLE (8): <i>The complex Frobenius theorem</i>	23
EXAMPLE (9): <i>G-structures</i>	24
EXAMPLE (10): <i>Structures defined by fields of endomorphisms</i>	27
B. DEFORMATION THEORY OF LIE STRUCTURES	29
THEOREM 1 (<i>General mechanism for deformation</i>)	33
EXAMPLE (1): <i>Volume structure</i>	38
EXAMPLE (2): <i>Symplectic structure</i>	40
EXAMPLE (3): Γ_G-<i>structure</i>	42
EXAMPLE (4): <i>Multifoliate structure</i>	42
EXAMPLE (5): <i>Cohen-Macaulay structure</i>	43
EXAMPLE (6): <i>Complex analytic structure</i>	46

CHAPTER I – JET SHEAVES AND DIFFERENTIAL EQUATIONS ..	49
1. <i>Notation</i>	49
2. <i>Jet bundles</i>	50
3. <i>The prolongation space $X_{(k)}$</i>	52
4. <i>Prolongation of sheaves</i>	55
5. <i>Coordinates</i>	61
6. <i>The first linear complex</i>	64
7. <i>The second linear complex</i>	75
8. <i>Homogeneous linear partial differential equations</i>	77
9. <i>Linear differential operators</i>	87
CHAPTER II – LINEAR LIE EQUATIONS ..	88
10. <i>Brackets in $\mathfrak{J}_k T$</i>	88
11. <i>Coordinates</i>	98
12. <i>Lie equations</i>	101
CHAPTER III – DERIVATIONS AND BRACKETS ..	104
13. <i>Derivations of scalar differential forms</i>	104
14. <i>The bracket $[\cdot, \cdot]$</i>	107
15. <i>The adjoint representation</i>	116
16. <i>The fundamental identities</i>	124
CHAPTER IV – NON-LINEAR COMPLEXES ..	136
17. <i>Non-linear jet sheaves</i>	136
18. <i>Coordinates</i>	142
19. <i>The Lie algebra of the groupoid $\Gamma_k X$</i>	144
20. <i>Actions of $\Gamma_k X$</i>	156
21. <i>The first non-linear complex</i>	159
22. <i>The \mathfrak{Q}_d representation and the operator $\tilde{\mathcal{D}}$</i>	170
23. <i>Invariance of $[\cdot, \cdot]$ and the second non-linear complex</i>	177
24. <i>Partial exactness of the second non-linear complex</i>	188
25. <i>The third non-linear complex</i>	202

CHAPTER V – DERIVATIONS OF JET FORMS	212
26. <i>The sheaves</i>	212
27. <i>The derivations</i>	217
28. <i>The \hat{D}-complex</i>	233
29. <i>The restricted \hat{D}-complex</i>	235
30. <i>The \hat{D}-complex and the twisting of d</i>	246
31. <i>The projective limits</i>	252
APPENDIX – LIE GROUPOIDS	257
32. <i>Definitions</i>	257
33. <i>The Exponential map</i>	261
34. <i>Prolongation of Lie groupoids</i>	269
35. <i>Examples</i>	271
