Introduction	i-ii
§ 0. Preliminaries	1
§ 1. Complexification of a real linear Lie group	11
§ 2. Intrinsic characterization of K_* and E	21
§ 3. \mathbb{R} -regular elements	36
§ 4. Discrete subgroups	47
§ 5. Some ergodic properties of discrete subgroups	53
§ 6. Real forms of semi-simple algebraic groups	57
§ 7. Automorphisms of \mathbb{F}^*	67
§ 8. The first main theorem	69
§ 9. The main conjecture and the main theorem	77
§ 10. Quasi-conformal mappings	80
Bibliography	96
Errata	98
