

CONTENTS

| | |
|---|----|
| Introduction | xi |
| Chapter I Differentiable Manifolds | 1 |
| 1. Differentiable manifolds | 1 |
| 2. Vector fields | 4 |
| 3. Differential forms | 9 |
| 4. Tensor fields..... | 12 |
| 5. Lie groups | 14 |
| 6. Transformation groups..... | 16 |
| 7. Principal fiber bundles | 17 |
| 8. Reduction of structural groups..... | 20 |
| 9. Associated fiber bundles | 21 |
| 10. Examples | 22 |
| Chapter II Connections in Fiber Bundles..... | 25 |
| 1. Connection in a principal fiber bundle | 25 |
| 2. Parallelism..... | 27 |
| 3. Holonomy groups | 31 |
| 4. Curvature form and structure equation | 34 |
| 5. Homomorphism of connections..... | 35 |
| 6. Reduction theorem for connections..... | 37 |
| 7. Holonomy theorem..... | 39 |
| 8. Local flatness | 41 |
| 9. Existence of connections..... | 41 |
| 10. Connections in associated bundles | 43 |
| 11. Examples | 45 |
| Notes for Chapter II | 47 |
| Chapter III Linear Connections | 49 |
| 1. Linear connections..... | 49 |
| 2. Torsion form and structure equations | 51 |
| 3. Covariant differentiation..... | 52 |
| 4. Γ_{ij}^k and equivalence of definitions | 55 |
| 5. Torsion and curvature tensor fields | 58 |

| | | |
|-----|---|-----------|
| 6. | Bianchi's identity | 61 |
| 7. | Geodesics and completeness | 63 |
| 8. | Normal coordinates | 64 |
| 9. | Automorphisms and Killing vector fields | 65 |
| 10. | Linear connections with $\nabla T=0$, $\nabla R=0$ | 69 |
| 11. | Affine connections | 73 |
| | Notes for Chapter III..... | 76 |
| | Bibliography | 78 |
