|--|-----|
| Commonly Used Symbols | xix |
| Chapter 1. Lie Groups..... | 1 |
| §1. Background | 1 |
| 1°. Lie Groups..... | 1 |
| 2°. Lie Subgroups | 2 |
| 3°. Homomorphisms, Linear Representations and Actions of Lie Groups..... | 3 |
| 4°. Operations on Linear Representations..... | 5 |
| 5°. Orbits and Stabilizers | 6 |
| 6°. The Image and the Kernel of a Homomorphism..... | 8 |
| 7°. Coset Manifolds and Quotient Groups | 9 |
| 8°. Theorems on Transitive Actions and Epimorphisms | 11 |
| 9°. Homogeneous Spaces | 12 |
| 10°. Inverse Image of a Lie Subgroup with Respect to a Homomorphism | 14 |
| 11°. Semidirect Product | 15 |
| Exercises | 16 |
| Hints to Problems | 17 |
| §2. Tangent Algebra | 19 |
| 1°. Definition of the Tangent Algebra..... | 19 |
| 2°. Tangent Homomorphism..... | 21 |
| 3°. The Tangent Algebra of a Stabilizer | 22 |
| 4°. The Adjoint Representation and the Jacobi Identity | 23 |
| 5°. Differential Equations for Paths on a Lie Group | 25 |
| 6°. Uniqueness Theorem for Lie Group Homomorphisms | 27 |
| 7°. Exponential Map..... | 28 |
| 8°. Existence Theorem for Lie Group Homomorphisms | 30 |
| 9°. Virtual Lie Subgroups | 33 |
| 10°. Automorphisms and Derivations | 35 |
| 11°. The Tangent Algebra of a Semidirect Product of Lie Groups ... | 36 |
| Exercises | 38 |
| Hints to Problems | 39 |

| | |
|---|----|
| §3. Connectedness and Simple Connectedness | 42 |
| 1° Connectedness | 43 |
| 2° Covering Homomorphisms | 44 |
| 3° Simply Connected Covering Lie Groups | 45 |
| 4° Exact Homotopy Sequence | 46 |
| Exercises | 48 |
| Hints to Problems | 48 |
| §4. The Derived Algebra and the Radical | 50 |
| 1° The Commutator Group and the Derived Algebra | 50 |
| 2° Malcev Closures | 51 |
| 3° Existence of Virtual Lie Subgroups | 52 |
| 4° Solvable Lie Groups | 53 |
| 5° Lie's Theorem | 54 |
| 6° The Radical. Semisimple Lie Groups | 55 |
| 7° Complexification | 56 |
| Exercises | 56 |
| Hints to Problems | 57 |
| Chapter 2. Algebraic Varieties | 59 |
| §1. Affine Algebraic Varieties | 59 |
| 1° Embedded Affine Varieties | 59 |
| 2° Morphisms | 61 |
| 3° Zariski Topology | 62 |
| 4° The Direct Product | 64 |
| 5° Homomorphism Extension Theorems | 65 |
| 6° The Image of a Dominant Morphism | 66 |
| 7° Hilbert's Nullstellensatz | 67 |
| 8° Rational Functions | 68 |
| 9° Rational Maps | 69 |
| 10° Factorization of a Morphism | 70 |
| Exercises | 71 |
| Hints to Problems | 72 |
| §2. Projective and Quasiprojective Varieties | 74 |
| 1° Graded Algebras | 74 |
| 2° Embedded Projective Algebraic Varieties | 75 |
| 3° Sheaves of Functions | 77 |
| 4° Sheaves of Algebras of Rational Functions | 79 |
| 5° Quasiprojective Varieties | 79 |
| 6° The Direct Product | 80 |
| 7° Flag Varieties | 83 |
| Exercises | 84 |
| Hints to Problems | 85 |

| | |
|--|-----|
| § 3. Dimension and Analytic Properties of Algebraic Varieties | 87 |
| 1°. Definition of the Dimension and its Main Properties | 87 |
| 2°. Derivations of the Algebra of Functions | 88 |
| 3°. Simple Points | 89 |
| 4°. The Analytic Structure of Complex and Real Algebraic Varieties | 90 |
| 5°. Realification of Complex Algebraic Varieties | 91 |
| 6°. Forms of Vector Spaces and Algebras | 92 |
| 7°. Real Forms of Complex Algebraic Varieties | 93 |
| Exercises | 94 |
| Hints to Problems | 96 |
| Chapter 3. Algebraic Groups | 98 |
| § 1. Background | 98 |
| 1°. Main Definitions | 98 |
| 2°. Complex and Real Algebraic Groups | 100 |
| 3°. Semidirect Products | 102 |
| 4°. Certain Theorems on Subgroups and Homomorphisms of Algebraic Groups | 102 |
| 5°. Actions of Algebraic Groups | 103 |
| 6°. Existence of a Faithful Linear Representation | 104 |
| 7°. The Coset Variety and the Quotient Group | 106 |
| Exercises | 108 |
| Hints to Problems | 108 |
| § 2. Commutative and Solvable Algebraic Groups | 110 |
| 1°. The Jordan Decomposition of a Linear Operator | 110 |
| 2°. Commutative Unipotent Algebraic Linear Groups | 111 |
| 3°. Algebraic Tori and Quasitori | 113 |
| 4°. The Jordan Decomposition in an Algebraic Group | 115 |
| 5°. The Structure of Commutative Algebraic Groups | 116 |
| 6°. Borel's Theorem | 116 |
| 7°. The Splitting of a Solvable Algebraic Group | 117 |
| 8°. Semisimple Elements of a Solvable Algebraic Group | 118 |
| 9°. Borel Subgroups | 118 |
| Exercises | 119 |
| Hints of Problems | 120 |
| § 3. The Tangent Algebra | 122 |
| 1°. Connectedness of Irreducible Complex Algebraic Groups | 122 |
| 2°. The Rational Structure on the Tangent Algebra of a Torus | 123 |
| 3°. Algebraic Subalgebras | 123 |
| 4°. The Algebraic Structure on Certain Complex Lie Groups | 124 |
| 5°. Engel's Theorem | 125 |

| | | |
|------------|--|-----|
| 6°. | Unipotent Algebraic Linear Groups | 126 |
| 7°. | The Jordan Decomposition in the Tangent Algebra of an Algebraic Group | 126 |
| 8°. | The Tangent Algebra of a Real Algebraic Group | 127 |
| 9°. | The Union of Borel Subgroups and the Centralizers of Tori | 127 |
| | Exercises | 128 |
| | Hints to Problems | 129 |
| §4. | Compact Linear Groups | 130 |
| 1°. | A Fixed Point Theorem | 130 |
| 2°. | Complete Reducibility | 131 |
| 3°. | Separating Orbits with the Help of Invariants | 132 |
| 4°. | Algebraicity | 133 |
| | Exercises | 134 |
| | Hints to Problems | 134 |
| Chapter 4. | Complex Semisimple Lie Groups | 136 |
| §1. | Preliminaries | 136 |
| 1°. | Invariant Scalar Products | 136 |
| 2°. | Algebraicity | 138 |
| 3°. | Normal Subgroups | 139 |
| 4°. | Weight and Root Decompositions | 140 |
| 5°. | Root Decompositions and Root Systems of Classical Lie Algebras | 144 |
| 6°. | Three-Dimensional Subalgebras | 147 |
| | Exercises | 149 |
| | Hints to Problems | 151 |
| §2. | Root Systems | 153 |
| 1°. | Principal Definitions and Examples | 153 |
| 2°. | Weyl Chambers and Simple Roots | 156 |
| 3°. | Borel Subgroups and Maximal Tori | 160 |
| 4°. | Weyl Group | 162 |
| 5°. | Dynkin Diagrams | 164 |
| 6°. | Cartan Matrices | 167 |
| 7°. | Classification | 169 |
| 8°. | Root and Weight Lattices | 172 |
| | Exercises | 174 |
| | Hints to Problems | 177 |
| §3. | Existence and Uniqueness Theorems | 181 |
| 1°. | Free Lie Algebras, Generators and Defining Relations | 182 |
| 2°. | Uniqueness Theorems | 183 |

| | |
|---|------------|
| 3°. Existence Theorems | 186 |
| 4°. The Linearity of a Connected Complex Semisimple Lie Group .. | 190 |
| 5°. The Center and the Fundamental Group | 191 |
| 6°. Classification of Connected Semisimple Lie Groups | 192 |
| 7°. Classification of Irreducible Representations | 193 |
| Exercises | 194 |
| Hints to Problems | 199 |
| §4. Automorphisms | 202 |
| 1°. The Group of Outer Automorphisms | 202 |
| 2°. Semisimple Automorphisms | 203 |
| 3°. Characters and Automorphisms of Quasi-Tori | 205 |
| 4°. Affine Root Decomposition | 207 |
| 5°. Affine Weyl Group | 209 |
| 6°. Affine Roots of a Simple Lie Algebra | 211 |
| 7°. Classification of Unitary Automorphisms of Simple Lie Algebras .. | 212 |
| 8°. Fixed Points of Semisimple Automorphisms of a Simply Connected Group | 214 |
| Exercises | 216 |
| Hints to Problems | 217 |
| Chapter 5. Real Semisimple Lie Groups | 221 |
| §1. Real Forms of Complex Semisimple Lie Groups and Algebras | 221 |
| 1°. Real Structures and Real Forms | 221 |
| 2°. Real Forms of Classical Lie Groups and Algebras | 225 |
| 3°. The Compact Real Form | 227 |
| 4°. Real Forms and Involutive Automorphisms | 229 |
| 5°. Involutive Automorphisms of Complex Simple Lie Algebras | 232 |
| 6°. Classification of Real Simple Lie Algebras | 233 |
| Exercises | 234 |
| Hints to Problems | 236 |
| §2. Compact Lie Groups and Reductive Algebraic Groups | 238 |
| 1°. Polar Decomposition | 238 |
| 2°. Lie Groups with Compact Tangent Algebras | 241 |
| 3°. Compact Real Forms of Reductive Algebraic Groups | 244 |
| 4°. Linearity of Compact Lie Groups | 245 |
| 5°. Correspondence Between Compact Lie Groups and Reductive Algebraic Groups | 246 |
| 6°. Complete Reducibility of Linear Representations | 247 |
| 7°. Maximal Tori in Compact Lie Groups | 249 |
| Exercises | 250 |
| Hints to Problems | 252 |

| | |
|--|-----|
| § 3. Cartan Decomposition | 254 |
| 1° Cartan Decomposition of a Semisimple Lie Algebra | 254 |
| 2° Cartan Decomposition of a Semisimple Lie Group | 256 |
| 3° Conjugacy of Maximal Compact Subgroups | 258 |
| 4° Canonically Embedded Subalgebras | 261 |
| 5° Classification of Connected Semisimple Lie Groups | 262 |
| 6° Linearizer | 264 |
| Exercises | 265 |
| Hints to Problems | 266 |
| § 4. Real Root Decomposition | 268 |
| 1° Maximal \mathbb{R} -Diagonalizable Subalgebras | 268 |
| 2° Real Root Systems | 270 |
| 3° Satake Diagram | 272 |
| 4° Split Semisimple Lie Algebras | 274 |
| 5° Iwasawa Decomposition | 275 |
| Exercises | 277 |
| Hints to Problems | 279 |
| Chapter 6. Levi Decomposition | 282 |
| 1° Levi's Theorem | 282 |
| 2° Existence of a Lie Group with the Given Tangent Algebra | 283 |
| 3° Malcev's Theorem | 284 |
| 4° Algebraic Levi Decomposition | 285 |
| Exercises | 287 |
| Hints to Problems | 288 |
| Reference Chapter | 289 |
| § 1. Useful Formulae | 289 |
| 1° Weyl Groups and Exponents | 289 |
| 2° Linear Representations of Complex Semisimple Lie Algebras | 290 |
| 3° Linear Representations of Real Semisimple Lie Algebras | 290 |
| § 2. Tables | 292 |
| Table 1. Weights and Roots | 292 |
| Table 2. Matrices Inverse to Cartan Matrices | 295 |
| Table 3. Centers, Outer Automorphisms and Bilinear Invariants | 297 |
| Table 4. Exponents | 299 |
| Table 5. Decomposition of Tensor Products and Dimensions of Certain Representations | 299 |
| Table 6. Affine Dynkin Diagrams | 305 |
| Table 7. Involutive Automorphisms of Complex Simple Lie Algebras | 307 |
| Table 8. Matrix Realizations of Classical Real Lie Algebras | 309 |

| | |
|--|-----|
| Table 9. Real Simple Lie Algebras | 312 |
| Table 10. Centers and Linearizers of Simply Connected Real Simple Lie Groups..... | 318 |
| Bibliography | 322 |
| Index | 325 |
