

Table of contents

1.	Introduction	1
2.	Preliminaries	14
3.	Decompositions of G	17
4.	Integral representation of eigenfunctions	26
5.	Fourier coefficients and Kloosterman sums	39
6.	Computation of some integrals I	47
7.	Poincaré series and their Fourier series expansions	73
8.	Computation of some integrals II	80
9.	Analytic continuations and functional equations	86
10.	Sum formulae (first form)	98
11.	Sum formulae (second form)	113
	Literature	123
	Index of notations	125
	Index of terminology	128
