Introduction to Volume 2 (Chapters VIII to XII)	747
<b>Chapter VIII. Banach *-Algebraic Bundles and Their Representations</b>	771
1. Multipliers of Algebras	773
2. Banach Algebraic Bundles	783
3. Banach *-Algebraic Bundles	792
4. Semidirect Product Bundles and Central Extension Bundles	798
5. The Cross-Sectional Algebra	803
6. Partial Cross-Sectional Bundles	811
7. Transformation Bundles	818
8. Locally Convex Representations of Banach Algebraic Bundles	823
9. *-Representations of Banach *-Algebraic Bundles and Unitary Representations of Groups	827
10. Projective Representations of Groups	833
11. Integrable Locally Convex Representations	837
12. The Recovery of a Fréchet Representation of $\mathcal{B}$ from its Integrated Form	848

13.	The Recovery of a $*$ -Representation of $\mathcal{B}$ from its Integrated Form	852
14.	The Existence of Irreducible $*$ -Representations of Banach $*$ -Algebraic Bundles	860
15.	The Extension of $*$ -Representations to Multipliers; Application to Semidirect Products and Partial Cross-Sectional Bundles	864
16.	$C^*$ -Algebraic Bundles; the Bundle $C^*$ -Completion	871
17.	Bundle Structures for $C^*$ -Algebras; the Glimm Algebras	885
18.	Transformation Bundles and Systems of Imprimitivity	889
19.	Ergodic Measure Transformation Spaces and Certain Irreducible Systems of Imprimitivity	901
20.	Functionals of Positive Type on Banach $*$ -Algebraic Bundles	906
21.	The Regional Topology of $*$ -Representations of Banach $*$ -Algebraic Bundles	913
22.	Exercises for Chapter VIII	925
	Notes and Remarks	929

## Chapter IX. Compact Groups 931

1.	Preliminary Remarks on Function Spaces	932
2.	The Peter-Weyl Theorem	934
3.	Finite-Dimensional Representations of $G$	937
4.	Orthogonality Relations	943
5.	Characters and Central Functions	947
6.	The Stone-Weierstrass Theorem for Representations	951
7.	$\sigma$ -Subspaces and Multiplicity for Locally Convex Representations of $G$	954
8.	Weak Féjer Summation	959
9.	The Structure of the Regular Representation and the Plancherel Formula	964
10.	Induced Representations and the Frobenius Reciprocity Theorem	967
11.	The Representations of $SU(2)$	979
12.	The Representations of $SO(3)$	985
13.	Exercises for Chapter IX	988
	Notes and Remarks	995

<b>Chapter X. Abelian Groups and Commutative Banach *-Algebraic Bundles</b>	999
1. The Character Group	1001
2. The Theorems of Stone, Bochner and Plancherel	1007
3. The Fourier Inversion Theorem, Regularity, and Pontryagin Duality	1016
4. Commutative Banach *-Algebraic Bundles	1024
5. Commutative $C^*$ -Algebraic Bundles	1035
6. Exercises for Chapter X	1042
Notes and Remarks	1047
<b>Chapter XI. Induced Representations and the Imprimitivity Theorem</b>	1049
1. Operator Inner Products	1055
2. Duality for Operator Inner Products	1064
3. $V$ -bounded Endomorphisms and Modules; Completely Positive Maps	1070
4. Rigged Modules and Abstractly Induced Representations	1078
5. General Properties of Abstractly Induced Representations	1088
6. Imprimitivity Bimodules and the Abstract Imprimitivity Theorem	1095
7. Topological Versions of the Abstract Imprimitivity Theorem	1107
8. Positivity of *-Representations with Respect to a Banach *-Algebraic Bundle	1121
9. Induced Hilbert Bundles and Induced Representations of a Banach *-Algebraic Bundle	1131
10. Mackey's and Blattner's Formulations of Induced Representations of Groups	1147
11. $\mathcal{B}$ -Positive Representations and the $C^*$ -Completion of $\mathcal{B}$	1155
12. Elementary Properties of Induced Representations of Banach *-Algebraic Bundles	1160
13. Restrictions and Tensor Products of Induced Representations of Banach *-Algebraic Bundles	1173
14. The Imprimitivity Theorem for Banach *-Algebraic Bundles	1179
15. A generalized Mackey–Stone–von Neumann Theorem	1198
16. Conjugation of Representations	1204
17. Non-Involutive Induced Representations	1225
18. Exercises for Chapter XI	1234
Notes and Remarks	1240

<b>Chapter XII. The Generalized Mackey Analysis</b>	1243
1. The Mackey Normal Subgroup Analysis for Finite Groups	1246
2. The Mackey Analysis in the General Case; Step I	1264
3. The Mackey Analysis in the General Case; Step II	1273
4. The Mackey Analysis in the General Case; Step III	1284
5. The Mackey Analysis in the General Case; Final Results	1301
6. Saturated $C^*$ -Algebraic Bundles with Unit Fibers of Compact Type	1311
7. Saturated Bundles over Compact Groups	1327
8. Examples	1340
9. Further Examples	1356
10. Exercises for Chapter XII	1366
Notes and Remarks	1368
Bibliography	1373
Name Index	1451
Subject Index	1457
Index of Notation	1477

## Topics in Volume 1

Chapter I. Preliminaries

Chapter II. Integration Theory and Banach Bundles

Chapter III. Locally Compact Groups

Chapter IV. Algebraic Representation Theory

Chapter V. Locally Convex Representations and Banach Algebras

Chapter VI.  $C^*$ -Algebras and Their  $*$ -Representations

Chapter VII. The Topology of the space of  $*$ -Representations
