	<u>Page</u>
Introduction	ix
1. Preliminary definitions and notation	3
2. The trace formula	11
3. Stable conjugacy	19
4. Orbital integrals and endoscopic groups	39
5. Stabilization	68
6. Weighted orbital integrals	79
7. Elliptic singular terms	89
8. Germ expansions and limit formulas	112
9. Singularities	134
10. The stable trace formula	153
11. The unitary group in two variables	161
12. Representation theory	171
13. Automorphic representations	198
14. Comparison of inner forms	232
15. Additional results	246
References	251
Subject Index	258
Notation Index	259
