Contents

Foreword ix

1 Introduction 3

2 Representations of $U(sl(2))$ 7

Basic definitions 7

Finite dimensional irreducible representations 7

Diagrammatics of $U(sl(2))$ invariant maps 12

The Temperley-Lieb algebra 15

Tensor products of irreducible representations 21

The $6j$-symbols 27

Computations 43

A recursion formula for the $6j$-symbols 63

Remarks 65

3 Quantum $sl(2)$ 67

Some finite dimensional representations 67

Representations of the braid groups 70

A finite dimensional quotient of $\mathbf{C}[B(n)]$. 74

A model for the representations V_A^j 77

The Jones-Wentzl projectors 80

The quantum Clebsch-Gordan theory 93

Quantum network evaluation 99

The quantum $6j$-symbols — generic case 106

Diagrammatics of weight vectors (quantum case) 110

Twisting rules 111

Symmetries 123

Further identities among the quantum $6j$-symbols . . . 125

4 The Quantum Trace and Color Representations 127

The quantum trace 127

A bilinear form on tangle diagrams 130

Color representations 133

The quantum $6j$-symbol — root of unity case 139

5 The Turaev-Viro Invariant 151

The definition of the Turaev-Viro invariant 151

Epilogue 157
