Table of Contents

Introduction..... 1

Chapter I Infinite Loop Spaces Associated with ImJ..... 9

1. Introduction..... 9
2. The real image of J spaces..... 10
3. The mod-2 homology of JO(q)..... 17
4. The symplectic and complex image of J spaces..... 20
5. The odd primary homology of JO(q)..... 24
6. The odd primary homology of JSp(q) and JU($\pm$q)..... 30
7. The integral cohomology of JO(q)..... 32
8. The integral cohomology of JSp(q) and JU($\pm$q)..... 45

Chapter II Permutative Categories of Classical Groups over Finite Fields..... 49

1. Introduction..... 49
2. Permutative categories and their associated infinite loop spaces..... 49
3. The orthogonal groups and their subgroups..... 67
4. Quadratic forms and extraordinary orthogonal groups.... 82
5. Spinor groups over finite fields..... 97
6. The general linear, symplectic and unitary groups..... 110
7. Orthogonal groups over finite fields of characteristic 2..... 117
8. Permutative functors associated with the classical groups..... 145

Chapter III K-Theory of Finite Fields and the ImJ spaces.... 166

1. Introduction..... 166
2. The Brauer lift..... 166
3. The main results..... 176
4. Mod p behavior of the classical groups..... 186
5. General pattern of arguments at noncharacteristic primes: determining homology generators and relations for the classical groups 197
6. General pattern of arguments at noncharacteristic primes: the Brauer lift..... 212
7. Algebraic closures of finite fields..... 224

Chapter IV Calculations at the prime 2..... 250

1. Introduction..... 250
2. $H_*B\bar{\mathcal{O}}(\mathbf{F}_q)$ and $H_*\Gamma_0B\bar{\mathcal{O}}(\mathbf{F}_q)$..... 250
3. The automorphism Φ..... 263
4. The cohomology rings $H^*BO(n,\mathbf{F}_q)$ and $H^*BO(\bar{n},\mathbf{F}_q)$..... 266
5. $H_*B\mathcal{Sp}(\mathbf{F}_q)$ and $H_*\Gamma_0B\mathcal{Sp}(\mathbf{F}_q)$..... 277
6. The cohomology rings $H^*BSp(2m,\mathbf{F}_q)$..... 282
7. $H_*B\mathcal{UL}(\mathbf{F}_q)$ and $H_*\Gamma_0B\mathcal{UL}(\mathbf{F}_q)$; $H_*B\mathcal{U}(\mathbf{F}_{q^2})$ and $H_*\Gamma_0B\mathcal{U}(\mathbf{F}_{q^2})$..... 283
8. The cohomology rings $H^*BGL(n,\mathbf{F}_q)$ and $H^*BU(n,\mathbf{F}_{q^2})$..... 287

Chapter V Calculations at Odd Primes..... 293

1. Introduction..... 293
2. $H_*B\bar{\mathcal{O}}(\mathbf{F}_q)$ and $H_*\Gamma_0B\bar{\mathcal{O}}(\mathbf{F}_q)$..... 293
3. $H_*B\mathcal{Sp}(\mathbf{F}_q)$ and $H_*\Gamma_0B\mathcal{Sp}(\mathbf{F}_q)$..... 301
4. $H_*B\mathcal{OBL}(\mathbf{F}_q)$, q even..... 303

5. $H_*B\mathcal{GL}(\mathbb{F}_q)$ and $H_*\Gamma_0 B\mathcal{GL}(\mathbb{F}_q)$; $H_*B\mathcal{U}(\mathbb{F}_{q^2})$ and $H_*\Gamma_0 B\mathcal{U}(\mathbb{F}_{q^2})$ 305

6. The cohomology rings $H^*BO(n,\mathbb{F}_q)$, $H^*BO(\bar{n},\mathbb{F}_q)$, $H^*BSp(2n,\mathbb{F}_q)$, $H^*BGL(n,\mathbb{F}_q)$, $H^*BU(n,\mathbb{F}_{q^2})$ 310

Chapter VI The Homology of Certain Finite Groups 313

1. Introduction 313

2. Cyclic groups 313

3. Dihedral groups D_r 322

4. $O(2,\mathbb{F}_q)$ 324

5. $SL(2,\mathbb{F}_q)$ and $Sp(4,\mathbb{F}_q)$ 328

6. $GL(2,\mathbb{F}_q)$ and $U(2,\mathbb{F}_q)$ 337

Chapter VII Detection Theorems at the Prime 2 343

1. Introduction 343

2. $O(n,\mathbb{F}_q)$ and $O(\bar{n},\mathbb{F}_q)$ 343

3. $Sp(2n,\mathbb{F}_q)$ 351

4. $GL(n,\mathbb{F}_q)$ and $U(n,\mathbb{F}_{q^2})$ 352

Chapter VIII Detection Theorems at Odd Primes 355

1. Introduction 355

2. Number theoretic preliminaries 355

3. $GL(m,\mathbb{F}_q)$ $q \equiv 1 \pmod{\ell}$ and $U(m,\mathbb{F}_{q^2})$ $q \equiv -1 \pmod{\ell}$ 359

4. $O(m,\mathbb{F}_q)$ and $O(\bar{m},\mathbb{F}_q)$ 365

5. $Sp(2m,\mathbb{F}_q)$ 376

6. $GL(m,\mathbb{F}_q)$ 379

7. $U(m,\mathbb{F}_{q^2})$ 381

Chapter IX Homology Operations Associated with the Classical Groups..... 386

1. Introduction..... 386

2. Homology operations in $H_*B\bar{\mathcal{O}}(\mathbf{F}_q)$ and $H_*\Gamma B\bar{\mathcal{O}}(\mathbf{F}_q)$..... 389

3. Homology operations in $H_*B\mathcal{Sp}(\mathbf{F}_q)$ and $H_*\Gamma B\mathcal{Sp}(\mathbf{F}_q)$..... 397

4. Homology operations in $H_*B\mathcal{UL}(\mathbf{F}_q)$ and $H_*\Gamma B\mathcal{UL}(\mathbf{F}_q)$ $H_*B\mathcal{U}(\mathbf{F}_{q^2})$, and $H_*\Gamma B\mathcal{U}(\mathbf{F}_q)$..... 401

Appendix Multiplicative Homology Operations Associated with the Orthogonal Groups..... 407

1. Introduction..... 407

2. Bipermutative categories and their associated infinite loop spaces..... 402

3. The multiplicative structure of $H_*B\bar{\mathcal{O}}(\mathbf{F}_q)$ and $H_*\Gamma B\bar{\mathcal{O}}(\mathbf{F}_q)$..... 413

Bibliography..... 429

Index..... 433
