

# Table of Contents

1. Basic Concepts . . . . .	1
2. Some Examples of Linear Groups . . . . .	17
3. Soluble Linear Groups . . . . .	41
4. Finitely Generated Linear Groups. . . . .	50
5. CZ-Groups and the Zariski Topology . . . . .	72
6. The Homomorphism Theorems . . . . .	82
7. The Jordan Decomposition and Splittable Linear Groups . . . . .	90
8. The Upper Central Series in Linear Groups. . . . .	101
9. Periodic Linear Groups . . . . .	112
10. Rank Restrictions, Varietal Properties and Wreath Products	134
11. Supersoluble and Locally Supersoluble Linear Groups . . . . .	155
12. A Localizing Technique and Applications . . . . .	174
13. Module Automorphism Groups over Commutative Rings . . . . .	186
14. Appendix on Algebraic Groups . . . . .	202
Suggestions for Further Reading . . . . .	219
Bibliography . . . . .	221
Index . . . . .	227
