

CONTENTS

INTRODUCTION	Aim and Structure of Logical Theory	1
CHAPTER I	Mathematical Preliminaries	7
	1. Intuitive Logic and Set Theory	8
	2. Mathematical Structures	10
	3. Partial Order and Trees	14
	4. Mathematical Induction	18
	5. Algorithms	20
CHAPTER II	Structure of Formal Languages	25
	1. Logical Grammar	26
	2. Syntactic Systems	28
	3. Semantic Concepts	31
	4. Valuation Space of a Language	33
	5. Semantic Entailment and Axiomatizability	40
	6. Theory of Deductive Systems	43
	7. System Complementation and Axiomatizability	46
	8. Filters and the Compactness Problem	51
	9. Ultraproducts and the Compactness Problem	60
	10. Partial Valuations and the Compactness Problem	66
		ix

CHAPTER III	Appraisal of Logical Systems	71
	1. Logical Systems	72
	2. Classical Propositional Logic: Axiomatics	77
	3. Classical Propositional Logic: Soundness and Completeness	82
	4. Interpretations of Logical Systems	87
	5. Interpretation Through Matrices	88
	6. Interpretation Through Supervaluations	94
CHAPTER IV	Classical Quantification and Identity Theory	99
	1. Syntax of Quantifier Languages	100
	2. Axiomatics of Quantificational Logic	104
	3. Referential Interpretation: Models	107
	4. Soundness and Completeness Theorems	112
	5. Compactness and Countable Models	115
	6. Elementary Relations Among Models	121
	7. Löwenheim–Skolem Theorem	122
	8. Deductive Theories	125
	9. Substitution Interpretation	127
	10. Extensions of Quantificational Logic	132
CHAPTER V	Nonclassical Logics	137
	1. Many-Valued Logics	138
	a. Substitution and Lindenbaum Algebras	138
	b. Compactness and Finite Matrices	142
	2. Modal Logics	144
	a. Normal Propositional Modal Logics	145

b. Transformation Semantics for Modal Logics	151
3. Logic of Presuppositions	153
a. Presupposition and Semantic Entailment	154
b. Policies on Presupposition	157
c. Epitheoretic Arguments	160
4. Concept of Truth	163
a. Truth and Bivalence	163
b. Designation of True Sentences	166
c. Truth Assertions in General	168
Appendix I Completeness of the Calculus of Systems	175
Appendix II Topological Matrices	179
Appendix III Satisfiability and Semantic Paradoxes	185
Problems	189
Solutions to Selected Problems	203
Index	217
Index of Symbols	225
