FOREWORD	v
PREFACE	vi
LIST OF SYMBOLS	ix
INTRODUCTION: MATHEMATICAL MODELS	xi
1. The Language of Sets	15
1.1 <i>Introduction</i>	15
1.2 <i>Sets</i>	16
1.3 <i>Operations with sets</i>	25
1.4 <i>Subsets</i>	31
1.5 <i>Relationships involving operations</i>	35
2. Mathematical Proof	40
2.1 <i>The limitations of diagrams</i>	40
2.2 <i>Proof</i>	41
2.3 <i>Symbolic language</i>	42
2.4 <i>Derived truth tables and tautologies</i>	47
2.5 <i>Statements involving variables</i>	54
2.6 <i>Statements involving two variables</i>	60
2.7 <i>Mathematical proof</i>	63
3. Relations and Functions	76
3.1 <i>Introduction</i>	76
3.2 <i>Ordered pairs and cartesian products</i>	77
3.3 <i>Relations</i>	79
3.4 <i>Equivalence relations</i>	85
3.5 <i>Partial order relations</i>	93
3.6 <i>Functions</i>	98
3.7 <i>Special functions</i>	101
3.8 <i>Finite and infinite sets</i>	105
4. Mathematical Theories	111
4.1 <i>Introduction</i>	111
4.2 <i>Binary operations</i>	111
4.3 <i>Groups</i>	121
4.4 <i>Metric spaces</i>	130
4.5 <i>Measure spaces</i>	140
5. Probability Theory	145
5.1 <i>Introduction</i>	145

CONTENTS	<i>Page</i>
5.2 <i>Finite probability spaces</i>	146
5.3 <i>Conditional probabilities</i>	156
5.4 <i>Tossing coins</i>	162
SOLUTIONS AND ANSWERS TO SELECTED EXERCISES	167
INDEX	181
