Contents

Preface iii

1 Sets 1

1. Introduction to Sets 1
2. Properties 4
3. The Axioms 8
4. Elementary Operations on Sets 14

2 Relations, Functions, and Orderings 18

1. Ordered Pairs 18
2. Relations 20
3. Functions 25
4. Equivalences and Partitions 32
5. Orderings 36
6. Operations and Structures 42

3 Natural Numbers 48

1. Introduction to Natural Numbers 48
2. Properties of Natural Numbers 52
3. The Recursion Theorem 57
4. Arithmetic of Natural Numbers 62
5. n-tuples and n-ary Relations and Operations 65
6. Finite Sets 68

4 Countable Sets 73

1. Cardinality of Sets 73
2. Countable and At Most Countable Sets 75

5 Integers and Rational Numbers 79

1. Integers 79
2. Rational Numbers 83

6 Real Numbers 89

1. Definition of Real Numbers 89
2. Order Properties of Real Numbers 94
3. Arithmetic of Real Numbers 97

7 Cardinal Numbers 100

1. Cardinality of Infinite Sets 100
2. Cardinal Arithmetic 104
3. The Continuum 108

8 Ordinal Numbers 112

1. Definition of Ordinals 112
2. Transfinite Induction and Recursion 115
3. Ordinal Arithmetic 121
4. Well-Orderings and Ordinal Numbers 129
5. Initial Ordinals and Hartogs Numbers 132

9 The Axiom of Choice 137

1. The Axiom of Choice and Its Equivalents 137
2. The Role of the Axiom of Choice in Mathematics 143

10 Arithmetic of Cardinal Numbers 151

1. Addition and Multiplication of Cardinals 151
2. Infinite Sums and Products of Cardinal Numbers 155
3. Regular and Singular Cardinals 160
4. Exponentiation of Cardinals 165

11 The Axiomatic Set Theory 171

1. The Zermelo–Fraenkel Set Theory with Choice 171
2. Consistency and Independence 174
3. Beyond ZFC 182

Index 187
