

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Logic and Combinatorics . . . . .	1
1.1.A	Set theory . . . . .	1
1.1.B	Sets and functions . . . . .	2
1.1.C	Stationary sets . . . . .	2
1.1.D	Trees . . . . .	3
1.1.E	Large cardinals . . . . .	4
1.2	Topology and Measure . . . . .	5
1.2.A	Borel sets . . . . .	5
1.2.B	Group structure . . . . .	7
1.2.C	Projective sets . . . . .	9
1.2.D	Borel codes . . . . .	11
1.3	Ideals and Cardinal Invariants . . . . .	11
1.3.A	Bounding and dominating numbers . . . . .	12
1.3.B	The ideal of countable subsets of $\kappa$ . . . . .	14
1.3.C	The ideals of meager and measure zero sets . . . . .	16
1.4	Forcing . . . . .	18
1.4.A	Proper forcing . . . . .	23
1.4.B	The Martin Axiom . . . . .	25
1.4.C	Composition of forcing . . . . .	26
1.5	Iterated Forcing . . . . .	27
1.5.A	Quotient forcing . . . . .	29
1.5.B	Preservation of ccc . . . . .	33
<b>2</b>	<b>Results in ZFC</b>	<b>35</b>
2.1	Null and Meager Sets . . . . .	35
2.2	Additivity of Category . . . . .	38
2.2.A	Characterizations of $\text{add}(\mathcal{M})$ and $\text{cof}(\mathcal{M})$ . . . . .	41
2.3	Additivity of Measure . . . . .	46
2.3.A	Combinatorial characterizations of $\text{add}(\mathcal{N})$ and $\text{cof}(\mathcal{N})$ . . . . .	50
2.4	Covering for Category . . . . .	53
2.4.A	Characterizations of $\text{cov}(\mathcal{M})$ . . . . .	54

2.5	Covering for Measure . . . . .	60
2.5.A	Small sets . . . . .	61
2.5.B	Small versus null sets . . . . .	63
2.5.C	Combinatorial characterization of $\text{cov}(\mathcal{N})$ . . . . .	67
2.5.D	Characterizations of $\text{non}(\mathcal{N})$ . . . . .	71
2.6	Closed Measure Zero Sets . . . . .	73
2.6.A	Combinatorics of the ideal $\mathcal{E}$ . . . . .	73
2.6.B	Cardinal invariants of the ideal $\mathcal{E}$ . . . . .	75
2.6.C	Closed measure zero sets and Cohen reals . . . . .	80
2.7	Transitive Coefficients . . . . .	86
2.7.A	Transitive bases for measure and category . . . . .	87
2.7.B	Transitive additivity . . . . .	90
2.7.C	Null- and meager-additive sets . . . . .	95
<b>3</b>	<b>Forcing</b> . . . . .	<b>99</b>
3.1	Basic Definitions . . . . .	99
3.2	Random Reals . . . . .	106
3.2.A	Cardinal invariants for $\mathcal{N}$ versus properties of $\mathbf{B}$ . . . . .	107
3.2.B	Subalgebras of the random real algebra . . . . .	110
3.2.C	Sets of random reals . . . . .	113
3.2.D	Random real algebra and the Martin Axiom . . . . .	121
3.2.E	Cardinal invariants and random reals . . . . .	125
3.2.F	Many random reals without dominating reals . . . . .	132
3.3	Cohen Reals . . . . .	138
3.3.A	Cohen reals and the Martin Axiom . . . . .	139
3.3.B	Cardinal invariants and Cohen reals . . . . .	142
3.4	Amoeba Forcing . . . . .	147
3.4.A	Cardinal invariants and Amoeba reals . . . . .	148
3.4.B	Amoeba ideal . . . . .	149
3.4.C	Amoeba ideal and meager sets . . . . .	157
3.5	Dominating Reals . . . . .	160
3.5.A	Rank function and the cardinal invariants . . . . .	162
3.5.B	Dominating ideal . . . . .	165
3.6	Suslin Forcing . . . . .	168
3.6.A	Basic facts about Suslin forcing . . . . .	168
3.6.B	Suslin forcing and cardinal invariants . . . . .	175
3.6.C	Examples of Suslin forcings . . . . .	177
3.6.D	Suslin forcing and Cohen reals . . . . .	190
3.7	Suslin Ideals . . . . .	193

<b>4</b>	<b>Filters on <math>\omega</math></b>	<b>205</b>
4.1	Measurability and the Baire Property of Filters . . . . .	205
4.1.A	Filters without the Baire property . . . . .	205
4.1.B	Nonmeasurable filters . . . . .	207
4.2	Filters on $\omega$ : Measure Versus Category . . . . .	210
4.2.A	A model where all nonmeasurable filters do not have the Baire property . . . . .	210
4.2.B	Bounded nonmeasurable filters . . . . .	213
4.3	Intersections of Filters . . . . .	216
4.3.A	Intersection of unbounded filters . . . . .	216
4.3.B	Intersection of nonmeasurable filters . . . . .	217
4.3.C	A model where the intersection of $< 2^{\aleph_0}$ ultrafilters has measure zero . . . . .	221
4.4	P-Points . . . . .	224
4.4.A	Characterizations of p-points . . . . .	224
4.4.B	A model where there are no p-points . . . . .	226
4.4.C	Nonmeager p-filters . . . . .	230
4.4.D	A model where every unbounded p-filter is generated by $> \mathfrak{d}$ elements . . . . .	231
4.5	Ramsey Filters . . . . .	235
4.5.A	Characterizations of Ramsey filters . . . . .	235
4.5.B	Ramsey filters and Cohen reals . . . . .	237
4.6	Rapid Filters . . . . .	239
4.6.A	A model where there are no rapid filters . . . . .	242
4.6.B	The Raisonni�er filter . . . . .	245
<b>5</b>	<b>Cofinalities of Cardinals Invariants</b>	<b>251</b>
5.1	Cofinality of $\text{cov}(\mathcal{M})$ and $\text{cov}(\mathcal{N})$ . . . . .	251
5.1.A	Ideal associated with $\text{cov}(\mathcal{M})$ . . . . .	251
5.1.B	Cofinality of $\text{cov}(\mathcal{M})$ . . . . .	255
5.1.C	Cofinality of $\text{cov}(\mathcal{N})$ . . . . .	261
5.2	Consistency Results Involving Singular Cardinals . . . . .	263
<b>6</b>	<b>Iteration</b>	<b>271</b>
6.1	Preservation Theorems . . . . .	271
6.1.A	Preservation of properness . . . . .	271
6.1.B	First Preservation Theorem . . . . .	273
6.1.C	Second Preservation Theorem . . . . .	282
6.2	Preservation of P-Points . . . . .	285
6.3	Applications — Countable Support Iteration . . . . .	290
6.3.A	Preservation of $\omega^\omega$ -bounding and “no dominating reals are added” . . . . .	291
6.3.B	Preservation of outer measure and “no random reals are added” . . . . .	292

6.3.C	Preservation of nonmeager sets and preservation of bases of the ideal of meager sets . . . . .	295
6.3.D	Preservation of the property " $\bigcup(\mathcal{M} \cap \mathbf{V}) \notin \mathcal{M}$ " . . . . .	298
6.3.E	Preservation of the Laver property and the property "old reals are not null additive" . . . . .	299
6.3.F	Preservation of bases of the ideal of measure zero sets and the property " $\bigcup(\mathcal{N} \cap \mathbf{V}) \notin \mathcal{N}$ " . . . . .	302
6.4	Finite Support Iteration . . . . .	305
6.5	Applications — Finite Support Iteration . . . . .	313
6.5.A	Preserving unbounded families . . . . .	313
6.5.B	Preserving the property " $\bigcup(\mathcal{N} \cap \mathbf{V}) \notin \mathcal{N}$ " . . . . .	317
6.5.C	Preservation of nonmeager sets . . . . .	320
6.5.D	Preservation of the property "no random reals are added" . . . . .	321
6.5.E	Preserving the property " $\bigcup(\mathcal{M} \cap \mathbf{V}) \notin \mathcal{M}$ " . . . . .	323
<b>7</b>	<b>Consistency Results</b> . . . . .	<b>325</b>
7.1	Basic Definitions and Notation . . . . .	325
7.2	More Preservation Theorems . . . . .	327
7.2.A	Property $\mathbf{L}_f$ . . . . .	327
7.2.B	Property $\mathbf{P}_f$ . . . . .	328
7.2.C	Property $\mathbf{B}$ . . . . .	330
7.2.D	Property $\mathbf{B}_{f,h}$ . . . . .	331
7.2.E	Preservation of not adding Cohen reals . . . . .	334
7.3	More Forcing Notions . . . . .	338
7.3.A	Forcings associated with $\text{add}(\mathcal{N})$ , $\text{cof}(\mathcal{N})$ , and $2^{\aleph_0}$ . . . . .	338
7.3.B	Forcing associated with $\text{non}(\mathcal{M})$ . . . . .	339
7.3.C	Forcing associated with $\text{non}(\mathcal{N})$ . . . . .	348
7.3.D	Forcing associated with $\mathfrak{b}$ . . . . .	352
7.3.E	Forcing associated with $\mathfrak{d}$ . . . . .	359
7.3.F	Forcings associated with $\text{cov}(\mathcal{M})$ and $\text{cov}(\mathcal{N})$ . . . . .	363
7.4	Other forcing notions . . . . .	363
7.4.A	The Mathias forcing $\mathbf{M}$ . . . . .	363
7.4.B	Eventually different forcing $\mathbf{E}$ . . . . .	366
7.4.C	Infinitely equal forcing $\mathbf{EE}$ . . . . .	367
7.4.D	Blass-Shelah forcing $\mathbf{Q}$ . . . . .	370
7.5	Models Satisfying $\mathfrak{b} = \square$ and $\mathfrak{d} = \blacksquare$ . . . . .	380
7.6	Models Satisfying $\mathfrak{b} = \blacksquare$ or $\mathfrak{d} = \square$ . . . . .	387
<b>8</b>	<b>Strong Measure Zero and Strongly Meager Sets</b> . . . . .	<b>399</b>
8.1	Characterizations of Strong Measure Zero Sets . . . . .	399
8.1.A	Strong measure zero in metric spaces . . . . .	400
8.1.B	Strong measure zero sets and translations . . . . .	405
8.2	Uncountable Strong Measure Zero Sets . . . . .	410
8.2.A	Basic constructions in ZFC . . . . .	410

8.2.B	Models with no strong measure zero sets of size $2^{\aleph_0}$ . . .	414
8.2.C	Strong measure zero sets of size $2^{\aleph_0}$ without Cohen reals	417
8.3	The Borel Conjecture . . . . .	417
8.3.A	The Borel Conjecture and $2^{\aleph_0} = \aleph_1$ . . . . .	418
8.3.B	The Borel conjecture and $2^{\aleph_0} > \aleph_1$ . . . . .	421
8.4	Additivity of the Ideal $\mathcal{SN}$ . . . . .	430
8.4.A	A model where $\text{cov}(\mathcal{SN}) < \text{add}(\mathcal{M})$ . . . . .	431
8.4.B	Increasing $\text{add}(\mathcal{SN})$ by forcing . . . . .	434
8.5	Strongly Meager Sets . . . . .	437
8.5.A	A characterization of strongly meager sets . . . . .	439
8.5.B	The Dual Borel Conjecture . . . . .	447
<b>9</b>	<b>Descriptive Set Theory</b> . . . . .	<b>449</b>
9.1	$\Sigma_1^1$ Sets of Reals . . . . .	449
9.2	$\Delta_2^1$ Sets of Reals . . . . .	452
9.2.A	Characterization of $\Delta_2^1(L)$ and $\Delta_2^1(B)$ . . . . .	452
9.2.B	$\Sigma_n^1$ - $\mathcal{P}$ -absoluteness . . . . .	456
9.3	$\Sigma_2^1$ Sets of Reals . . . . .	457
9.3.A	$\Sigma_2^1$ filters on $\omega$ . . . . .	461
9.4	$\Delta_3^1$ Sets of Reals . . . . .	462
9.4.A	A model where all $\Delta_3^1$ sets are measurable and have the Baire property . . . . .	464
9.4.B	$\mathbf{MA} + \Delta_3^1(B)$ . . . . .	467
9.4.C	$\Delta_3^1(L) \not\leftrightarrow \Delta_3^1(B)$ . . . . .	471
9.5	$\Sigma_3^1$ Sets of Reals . . . . .	474
9.6	$\Sigma_n^1$ Sets of Reals . . . . .	478
9.6.A	Collapsing algebra . . . . .	479
9.7	Projective Measurability and the Martin Axiom . . . . .	484
9.7.A	$\mathbf{MA}_{\aleph_1}$ (Suslin) and $\Sigma_n^1(L)$ . . . . .	484
9.7.B	$\mathbf{MA}_{\aleph_1}$ ( $\sigma$ -linked) and $\Sigma_n^1(L)$ . . . . .	486
9.7.C	$\mathbf{MA}$ and $\Sigma_n^1(L)$ . . . . .	491
9.8	The Baire Property without Inaccessible Cardinals . . . . .	495
9.8.A	Amalgamation . . . . .	497
9.8.B	Sweet forcings . . . . .	501
9.8.C	A model where all projective sets have the Baire prop- erty and $2^{\aleph_0}$ is large . . . . .	508
	<b>Bibliography</b> . . . . .	<b>517</b>
	<b>List of Symbols</b> . . . . .	<b>531</b>
	<b>Index</b> . . . . .	<b>535</b>
