CONTENTS

Preface vii

Part I. Introduction to set theory 1

Introduction 3

1. Notation, conventions 5
2. Definition of equivalence. The concept of cardinality. The Axiom of Choice 11
3. Countable cardinal, continuum cardinal 15
4. Comparison of cardinals 21
5. Operations with sets and cardinals 28
6. Examples 36
7. Ordered sets. Order types. Ordinals 41
8. Properties of wellordered sets. Good sets. The ordinal operation 54
9. Transfinite induction and recursion. Some consequences of the Axiom of Choice, the Wellordering Theorem 66
10. Definition of the cardinality operation. Properties of cardinalities. The cofinality operation 77
11. Properties of the power operation 93

Hints for solving problems marked with * in Part I 101

Appendix. An axiomatic development of set theory 107

Introduction 109

A1. The Zermelo–Fraenkel axiom system of set theory 111
A2. Definition of concepts; extension of the language 114
A3. A sketch of the development. Metatheorems 117
A4. A sketch of the development. Definitions of simple operations and properties (continued) 122
A5. A sketch of the development. Basic theorems, the introduction of ω and $\mathbf{R}$ (continued) 124
A6. The ZFC axiom system. A weakening of the Axiom of Choice. Remarks on the theorems of Sections 2–7 128
A7. The role of the Axiom of Regularity 130
A8. Proofs of relative consistency. The method of interpretation 133

A9. Proofs of relative consistency. The method of models 138

Part II. Topics in combinatorial set theory **143**

12. Stationary sets 145
13. Δ-systems 159
14. Ramsey's Theorem and its generalizations. Partition calculus 164
15. Inaccessible cardinals. Mahlo cardinals 184
16. Measurable cardinals 190
17. Real-valued measurable cardinals, saturated ideals 203
18. Weakly compact and Ramsey cardinals 216
19. Set mappings 228
20. The square-bracket symbol. Strengthenings of the Ramsey counterexamples 234
21. Properties of the power operation. Results on the singular cardinal problem 243
22. Powers of singular cardinals. Shelah's Theorem 259

Hints for solving problems of Part II 272
