

I. Permutations and combinations	
1.1. Combinations of n things taken r at a time, etc.	1
1.2. Identities involving binomial coefficients	2
II. Inversion formulae	
2.1. The principle of inclusion and exclusion; permanents	4
2.2. Derangements	6
2.3. Ménage numbers	7
2.4. Incidence algebras and Möbius functions	11
2.5. An application of Möbius inversion	13
2.6. Permutations with restricted position	15
III. Generating functions and recursions	
3.1. The recursion $u_n = \sum_{i=1}^n u_i u_{n-i}$	21
3.2. Stirling numbers	27
IV. Partitions	
4.1. The number $p_3(n)$	33
4.2. Asymptotic properties of $p(n)$	34
4.3. Partitions, series and products	36
V. Distinct representatives	
5.1. On the number of systems of distinct representatives of sets	40
5.2. Independent representatives	43
5.3. A problem on SDR's	50
5.4. An application of linear recurrences	52
5.5. Permanents	54
5.6. Partial Latin squares	62
5.7. A matching problem	63
5.8. Theorems of Birkhoff and Caratheodory	65
VI. Ramsey's theorem	
6.1. Introduction; elementary theorems	69
6.2. Some values of $N(p,q;2)$	72
6.3. The numbers $N(p,p;2)$	72
6.4. Inequalities for $N(p,3;2)$	73
6.5. Turan's theorem	74
6.6. Infinite graphs	74

VII. Some extremal problems	77
7.1. The assignment problem	77
7.2. Dilworth's theorem	80
VIII. Convex spaces	80
IX. De Bruijn sequences	82
9.1. The number of De Bruijn sequences	87
9.2. Shift register sequences	90
9.3. Randomness properties of De Bruijn sequences	93
X. Block designs	99
10.1. Block designs	99
10.2. Block designs with repeated blocks	103
XI. Difference sets	105
XII. Finite geometries	107
12.1. The theorem of Desargues	108
12.2. Automorphisms	111
12.3. Near-fields	112
XIII. Orthogonal Latin squares	114
13.1. Applications of H. Theorem 13.3.2	114
13.2. Two generalizations of H. Theorem 13.3.2	116
13.3. Some values of $N(n)$	116
13.4. Three recent theorems of R.M. Wilson	117
13.5. Lower bounds for $N(n)$ , $2 \leq n \leq 100$	117
13.6. The function $n_r$	120
XIV. Hadamard matrices	122
14.1. More about C- and S-matrices	122
14.2. A recent theorem of R.J. Turyn	123
14.3. Application of the construction methods	125
XV. Constructions of block designs	125
15.1. Repeated blocks	126
15.2. Steiner triple systems	128
15.3. Recent results	130
