Preface	v
<b>Chapter 1 The Problems of Computational Combinatorics</b>	<b>1</b>
1.1 Introduction	1
1.2 Where?	1
1.3 Which is Best?	3
1.4 Methods	4
<b>Chapter 2 Constant Coefficient Difference Equations</b>	<b>5</b>
2.1 Introduction	5
2.2 The Homogeneous Equation	8
2.3 The Complete Equation	11
2.4 Solution by Generating Functions	23
2.5 Simultaneous Equations	25
2.6 Applications	26
2.7 Bibliography	30
2.8 Exercises	31
<b>Chapter 3 Other Difference Equations</b>	<b>36</b>
3.1 Variable Coefficients	36
3.2 Reduction of the Order	42
3.3 Partial Difference Equations	48
3.4 Bibliography	51
3.5 Exercises	52
<b>Chapter 4 Elementary Configurations</b>	<b>54</b>
4.1 Introduction	54
4.2 Combinations and Permutations	54
4.3 Generating Functions	60
4.4 The Principle of Inclusion and Exclusion	64
4.5 Partitions and Compositions of Integers	67
4.6 Graphs and Trees	74

4.7	Bibliography	88
4.8	Exercises	90
<b>Chapter 5 Ordering and Generation of Elementary Configurations</b>		97
5.1	Lexicographical Orderings	97
5.2	Permutations	103
5.3	The Generation of Combinations	116
5.4	The Generation of Compositions	118
5.5	The Generation of Partitions	120
5.6	Recurrence Relations	122
5.7	Bibliography	125
5.8	Exercises	127
<b>Chapter 6 Search Procedures</b>		131
6.1	Backtrack Programming	131
6.2	Branch and Bound Methods	139
6.3	Dynamic Programming	149
6.4	Complexity	154
6.5	Bibliography	156
6.6	Exercises	157
<b>Chapter 7 Theorems and Algorithms for Selection</b>		164
7.1	Introduction	164
7.2	Systems of Distinct Representatives	165
7.3	Algorithms for Systems of Distinct Representatives	169
7.4	Matrices of Zeros and Ones	173
7.5	Assignment Problems	175
7.6	Bibliography	188
7.7	Exercises	189
<b>Notes on the Solutions to Exercises</b>		195
<b>Index</b>		215
