Preface			9
	Problems	Hints	Solutions
§ 1. Basic enumeration (partitions of sets and numbers, recurrence relations and generating functions, combinatorial identities)	13	93	141
§ 2. The sieve (inclusion-exclusion, Selberg sieve, second moment method, Moebius function)	19	97	175
§ 3. Permutations (cycle index polynomial, Hall–Rényi coding, Pólya–Redfield method)	25	99	196
§ 4. Two classical enumeration problems in graph theory (labelled and unlabelled trees, spanning trees of a graph; 1-factors, the Ising problem, restricted permutations)	29	101	216
§ 5. Parity and duality (Eulerian graphs, planar duality, Sperner’s Lemma, the linear space of cuts and cycles, planarity criteria)	34	105	248
§ 6. Connectivity (trees, ear-structures, Menger’s Theorem, a calculus of cutsets, flow theory)	39	108	267
§ 7. Factors of graphs (König’s Theorem, Tutte’s Theorem, the structure of factors of graphs, realizability of degree sequences)	48	113	303
§ 8. Independent sets of points (kernel, games on graphs, α -critical graphs)	55	116	338
§ 9. Chromatic number (degree conditions, potential, Hajós’ Construction, χ -critical graphs, perfect graphs, chromatic polynomial, planar graphs)	58	118	349
§ 10. Extremal problems for graphs (girth, degree, and disjoint circuits; existence of subdivisions, paths and Hamiltonian circuits; Turán’s Theorem)	64	122	376
§ 11. Spectra of graphs (relations to the structure and automorphism group, strongly regular graphs)	70	125	405
§ 12. Automorphisms of graphs (Frucht’s Theorem, transitive groups, topological problems, endomorphisms)	74	127	421

	Problems	Hints	Solutions
§ 13. Hypergraphs (circuits, transversal theory, intersection properties and extremal problems, 2-colorability, integral and fractional packing and covering, normal hypergraphs and perfect graphs)	76	129	439
§ 14. Ramsey Theory (Ramsey's Theorem, monochromatic paths and circuits in graphs, geometrical configurations, Van der Waerden's Theorem, monotony and convexity)	84	134	478
§ 15. Reconstruction (line-graphs, the Reconstruction Conjecture, cancellation property of products)	89	137	506
Dictionary of the combinatorial phrases and concepts used			528
Notation			541
Index of the abbreviations of textbooks and monographs			543
Subject index			545
