

TABLE OF CONTENTS

PART I. ASSOCIATION SCHEMES

	Page
INTRODUCTION	vii
CHAPTER I. REPRESENTATIONS OF FINITE GROUPS	1
1.1 Representations of Groups	2
1.2 Representations by Unitary Matrices and Complete Reducibility of Representations of Finite Groups	7
1.3 Schur's Lemma	10
1.4 Orthogonality Relations of Characters	12
1.5 Induced Representations	23
1.6 Product of Representations	29
1.7 Sharp Permutation Groups	34
1.8 Notes to Chapter I	40
CHAPTER II. ASSOCIATION SCHEMES	42
2.1 Centralizer Rings of Permutation Representations	45
2.2 Association Schemes	52
2.3 Adjacency Algebras (Bose-Mesner Algebras), Orthogonality Relations of Eigenmatrices, and Krein Parameters	58
2.4 Formulae for m_i	71
2.5 The Kawada-Delsarte Duality in C-Algebras	87
2.6 S-Rings and Permutation Groups with Regular Subgroups	104
2.7 An Interpretation of the Character Table of a Finite Group	113
2.8 Norton Algebras and Permutation Groups	123

	Page
2.9 Primitivity and Imprimitivity of Association Schemes	134
2.10 Tannaka-Krein Duality for Non-Commutative Association Schemes	153
2.11 Spherical Functions of Multiplicity-Free Permutation Representations	167
2.12 Notes to Chapter II	179
 CHAPTER III. DISTANCE-REGULAR GRAPHS AND (P AND Q)-POLYNOMIAL ASSOCIATION SCHEMES	 185
3.1 Distance-Regular Graphs and P-Polynomial Association Schemes	188
3.2 The Hamming Schemes $H(n,q)$ and the Johnson Schemes $J(v,k)$	207
3.3 Moore Graphs and Related Extremal Cases	225
3.4 Multiple P-Polynomial Structures	238
3.5 (P and Q)-Polynomial Association Schemes and Theorem of Leonard	260
3.6 The List of Known (P and Q)-Polynomial Association Schemes	300
3.7 The Rationality of Eigenvalues of (P and Q)-Polynomial Schemes	330
3.8 A Review of the Characterization Problem of Known (P and Q)-Polynomial Schemes by the Parameters	366
3.9 Notes to Chapter III	373
