## Part I. Propositional Logic from the Viewpoint of Analytic Tableaux

Chapter I. Preliminaries . . . . .	3
§ 0. Foreword on Trees . . . . .	3
§ 1. Formulas of Propositional Logic . . . . .	4
§ 2. Boolean Valuations and Truth Sets . . . . .	9
Chapter II. Analytic Tableaux . . . . .	15
§ 1. The Method of Tableaux . . . . .	15
§ 2. Consistency and Completeness of the System . . . . .	25
Chapter III. Compactness . . . . .	30
§ 1. Analytic Proofs of the Compactness Theorem . . . . .	30
§ 2. Maximal Consistency: Lindenbaum's Construction . . . . .	36
§ 3. An Analytic Modification of Lindenbaum's Proof . . . . .	38
§ 4. The Compactness Theorem for Deducibility. . . . .	40

## Part II. First-Order Logic

Chapter IV. First-Order Logic, Preliminaries . . . . .	43
§ 1. Formulas of Quantification Theory . . . . .	43
§ 2. First-Order Valuations and Models . . . . .	46
§ 3. Boolean Valuations vs. First-Order Valuations. . . . .	51
Chapter V. First-Order Analytic Tableaux . . . . .	52
§ 1. Extension of Our Unified Notation . . . . .	52
§ 2. Analytic Tableaux for Quantification Theory . . . . .	53
§ 3. The Completeness Theorem. . . . .	57
§ 4. The Skolem-Löwenheim and Compactness Theorems for First-Order Logic . . . . .	63
Chapter VI. A Unifying Principle . . . . .	65
§ 1. Analytic Consistency. . . . .	65
§ 2. Further Discussion of Analytic Consistency . . . . .	67
§ 3. Analytic Consistency Properties for Finite Sets . . . . .	69
Chapter VII. The Fundamental Theorem of Quantification Theory. . . . .	70
§ 1. Regular Sets . . . . .	71
§ 2. The Fundamental Theorem . . . . .	73
§ 3. Analytic Tableaux and Regular Sets . . . . .	75
§ 4. The Liberalized Rule <i>D</i> . . . . .	78
Chapter VIII. Axiom Systems for Quantification Theory . . . . .	79
§ 0. Foreword on Axiom Systems . . . . .	80

§ 1. The System $Q_1$ . . . . .	81
§ 2. The Systems $Q_2, Q_2^*$ . . . . .	84
Chapter IX. Magic Sets . . . . .	86
§ 1. Magic Sets . . . . .	87
§ 2. Applications of Magic Sets . . . . .	89
Chapter X. Analytic versus Synthetic Consistency Properties . . . . .	91
§ 1. Synthetic Consistency Properties . . . . .	91
§ 2. A More Direct Construction . . . . .	96
<b>Part III. Further Topics in First-Order Logic</b>	
Chapter XI. Gentzen Systems . . . . .	101
§ 1. Gentzen Systems for Propositional Logic . . . . .	101
§ 2. Block Tableaux and Gentzen Systems for First-Order Logic . . . . .	109
Chapter XII. Elimination Theorems . . . . .	110
§ 1. Gentzen's Hauptsatz . . . . .	110
§ 2. An Abstract Form of the Hauptsatz . . . . .	111
§ 3. Some Applications of the Hauptsatz . . . . .	115
Chapter XIII. Prenex Tableaux . . . . .	117
§ 1. Prenex Formulas . . . . .	117
§ 2. Prenex Tableaux . . . . .	118
Chapter XIV. More on Gentzen Systems . . . . .	121
§ 1. Gentzen's Extended Hauptsatz . . . . .	121
§ 2. A New Form of the Extended Hauptsatz . . . . .	122
§ 3. Symmetric Gentzen Systems . . . . .	124
Chapter XV. Craig's Interpolation Lemma and Beth's Definability Theorem . . . . .	127
§ 1. Craig's Interpolation Lemma . . . . .	127
§ 2. Beth's Definability Theorem . . . . .	131
Chapter XVI. Symmetric Completeness Theorems . . . . .	133
§ 1. Clashing Tableaux . . . . .	133
§ 2. Clashing Prenex Tableaux . . . . .	136
§ 3. A Symmetric Form of the Fundamental Theorem . . . . .	136
Chapter XVII. Systems of Linear Reasoning . . . . .	141
§ 1. Configurations . . . . .	142
§ 2. Linear Reasoning . . . . .	151
§ 3. Linear Reasoning for Prenex Formulas . . . . .	153
§ 4. A System Based on the Strong Symmetric Form of the Fundamental Theorem . . . . .	154
References . . . . .	156
Subject Index . . . . .	157
