Preface

CHAPTER 1	DESIGNS	1
1.1	Definitions and basic properties	1
1.2	Symmetric block designs	7
1.3	Finite fields	18
1.4	Finite geometries and designs	23
1.5	Permutation groups	35
1.6	Permutation groups and designs	44
1.7	Extension of designs	54
	Notes on Chapter 1	68
CHAPTER 2	CODES AND DESIGNS	71
2.1	The Plotkin bound	72
2.2	Hadamard matrices and designs	79
2.3	Equidistant codes and resolvable designs	89
2.4	Constant weight codes	96
2.5	Perfect codes and designs	101
2.6	The Assmus-Mattson theorem	114
2.7	Majority logic decodable codes	123
	Notes on Chapter 2	132
CHAPTER 3	STRONGLY REGULAR GRAPHS	135
3.1	Necessary conditions	135
3.2	Quasi-symmetric designs	149
3.3	Strongly regular graphs without triangles	158
3.4	Strongly regular graphs and symmetric designs	162

3.5 Rank 3 graphs and designs	166
3.6 Rank 3 graphs and unequal error protection codes	171
Notes on Chapter 3	176
References	179
Index	187
