Preface .....	vii
---------------	-----

## Chapter 1. Elementary Enumeration

§1. Counting Is Hard .....	1
§2. Conventions .....	2
§3. Permutations .....	3
§4. A Discussion Question .....	4
§5. The Pigeonhole Principle .....	4
§6. $n$ Chose $r$ by Way of MISSISSIPPI .....	5
§7. The Round Table .....	7
§8. The Birthday Problem .....	10
§9. $n$ Chose $r$ with Repetition .....	11
§10. Ice Cream Cones—The Double Dip .....	17
§11. Block Walking .....	18
§12. Quickies and Knights .....	19
§13. The Binomial Theorem .....	22
§14. Homework for a Week .....	23
§15. Three Hour Exams .....	24

## Chapter 2. The Principle of Inclusion and Exclusion

§16. Introduction to PIE .....	27
§17. Proof of PIE .....	30
§18. Derangements .....	32

§19. Partitions .....	34
§20. Balls into Boxes .....	35
§21. A Plethora of Problems .....	38
§22. Eating Out .....	39

### Chapter 3. Generating Functions

§23. What Is $x$ ? .....	43
§24. An Algebraic Excursion to $\mathbb{R}[[x]]$ .....	44
§25. Introducing Generating Functions .....	46
§26. Clotheslines .....	47
§27. Examples and Homework .....	52
§28. Computations .....	57
§29. Exponential Generating Functions .....	59
§30. Comprehensive Exams .....	64

### Chapter 4. Groups

§31. Symmetry Groups .....	67
§32. Legendre's Theorem .....	71
§33. Permutation Groups .....	74
§34. Generators .....	77
§35. Cyclic Groups .....	80
§36. Equivalence and Isomorphism .....	82

### Chapter 5. Actions

§37. The Definition .....	85
§38. Burnside's Lemma .....	88
§39. Applications of Burnside's Lemma .....	94
§40. Pólya's Pattern Inventory .....	100
§41. Necklaces .....	108

### Chapter 6. Recurrence Relations

§42. Examples of Recurrence Relations .....	113
§43. The Fibonacci Numbers .....	117
§44. A Dozen Recurrence Problems .....	121
§45. Solving Recurrence Relations .....	122
§46. The Catalan Numbers .....	125
§47. Nonhomogeneous Recurrence Relations .....	133

## Chapter 7. Mathematical Induction

§48. The Principle of Mathematical Induction .....	137
§49. The Strong Form of Mathematical Induction .....	142
§50. Hall's Marriage Theorem .....	146

## Chapter 8. Graphs

§51. The Vocabulary of Graph Theory .....	153
§52. Walks, Trails, Circuits, Paths, and Cycles .....	160
§53. Trees .....	168
§54. Degree Sequences .....	175
§55. Euler's Formula .....	177

The Back of the Book .....	183
----------------------------	-----

Index .....	247
