

## Table of Contents

1. Categories . . . . .	1
1.1 Definition of Categories . . . . .	1
1.2 Examples . . . . .	2
1.3 Isomorphisms . . . . .	3
1.4 Further Examples . . . . .	3
1.5 Additive Categories . . . . .	4
1.6 Subcategories . . . . .	4
1.7 Problems . . . . .	5
2. Functors . . . . .	5
2.1 Covariant Functors . . . . .	5
2.2 Standard Examples . . . . .	6
2.3 Contravariant Functors . . . . .	7
2.4 Dual Categories . . . . .	9
2.5 Bifunctors . . . . .	10
2.6 Natural Transformations . . . . .	12
2.7 Problems . . . . .	15
3. Categories of Categories and Categories of Functors . . . . .	16
3.1 Preliminary Remarks . . . . .	16
3.2 Universes . . . . .	17
3.3 Conventions . . . . .	18
3.4 Functor Categories . . . . .	19
3.5 The Category of Small Categories . . . . .	21
3.6 Large Categories . . . . .	21
3.7 The Evaluation Functor . . . . .	22
3.8 The Additive Case . . . . .	23
3.9 Problems . . . . .	24
4. Representable Functors . . . . .	24
4.1 Embeddings . . . . .	24
4.2 Yoneda Lemma . . . . .	25
4.3 The Additive Case . . . . .	27
4.4 Representable Functors . . . . .	28
4.5 Partially Representable Bifunctors . . . . .	30
4.6 Problems . . . . .	32
5. Some Special Objects and Morphisms . . . . .	32
5.1 Monomorphisms . . . . .	32
5.1° Epimorphisms . . . . .	33
5.2 Retractions and Coretractions . . . . .	34
5.3 Bimorphisms . . . . .	34
5.4 Terminal and Initial Objects . . . . .	35

5.5	Zero objects . . . . .	35
5.6	Problems . . . . .	36
6.	Diagrams . . . . .	37
6.1	Diagram Schemes and Diagrams . . . . .	37
6.2	Diagrams with Commutativity Conditions . . . . .	38
6.3	Diagrams as Presentations of Functors . . . . .	40
6.4	Quotients of Categories . . . . .	42
6.5	Classes of Mono-, resp., Epimorphisms . . . . .	43
6.6	Problems . . . . .	44
7.	Limits . . . . .	45
7.1	Definition of Limits . . . . .	45
7.2	Equalizers . . . . .	47
7.3	Products . . . . .	49
7.4	Complete Categories . . . . .	50
7.5	Limits in Functor Categories . . . . .	52
7.6	Double Limits . . . . .	54
7.7	Criteria for Limits . . . . .	56
7.8	Pullbacks . . . . .	58
7.9	Problems . . . . .	61
8.	Colimits . . . . .	62
8.1	Definition of Colimits . . . . .	62
8.2	Coequalizers . . . . .	64
8.3	Coproducts . . . . .	65
8.4	Cocomplete Categories . . . . .	65
8.5	Colimits in Functor Categories . . . . .	66
8.6	Double Colimits . . . . .	67
8.7	Criteria for Colimits . . . . .	67
8.8	Pushouts . . . . .	68
8.9	Problems . . . . .	68
9.	Filtered Colimits . . . . .	69
9.1	Connected Categories . . . . .	69
9.2	On the Calculation of Limits and Colimits . . . . .	69
9.3	Filtered Categories . . . . .	71
9.4	Filtered Colimits . . . . .	73
9.5	Commutativity Theorems . . . . .	76
9.6	Problems . . . . .	79
10.	Setvalued Functors . . . . .	81
10.2	Properties Inherited from the Codomain Category . . . . .	81
10.2	The Yoneda Embedding $H_* : \mathcal{C} \rightarrow [\mathcal{C}^0, \mathit{Ens}]$ . . . . .	84
10.3	The General Representation Theorem . . . . .	86
10.4	Projective and Injective Objects . . . . .	89
10.5	Generators and Cogenerators . . . . .	91
10.6	Well-powered Categories . . . . .	92
10.7	Problems . . . . .	95
11.	Objects with an Algebraic Structure . . . . .	96
11.1	Algebraic Structures . . . . .	96
11.2	Operations of an Object on Another . . . . .	99

11.3	Homomorphisms . . . . .	100
11.4	Reduction to <i>Ens</i> . . . . .	102
11.5	Limits and Filtered Colimits . . . . .	103
11.6	Homomorphically Compatible Structures . . . . .	106
11.7	Problems . . . . .	108
12.	Abelian Categories . . . . .	110
12.1	Survey . . . . .	110
12.2	Semi-additive Structure . . . . .	111
12.3	Kernels and Cokernels . . . . .	113
12.4	Factorization of Morphisms . . . . .	116
12.5	The Additive Structure . . . . .	119
12.6	Idempotents . . . . .	122
12.7	Problems . . . . .	122
13.	Exact Sequences . . . . .	123
13.1	Exact Sequences in Exact Categories . . . . .	123
13.2	Short Exact Sequences . . . . .	125
13.3	Exact and Faithful Functors . . . . .	127
13.4	Exact Squares . . . . .	130
13.5	Some Diagram Lemmas . . . . .	134
13.6	Problems . . . . .	138
14.	Colimits of Monomorphisms . . . . .	139
14.1	Preordered Classes . . . . .	139
14.2	Unions of Monomorphisms . . . . .	141
14.3	Inverse Images of Monomorphisms . . . . .	142
14.4	Images of Monomorphisms . . . . .	143
14.5	Constructions for Colimits . . . . .	145
14.6	Grothendieck Categories . . . . .	147
14.7	Problems . . . . .	151
15.	Injective Envelopes . . . . .	152
15.1	Modules over Additive Categories . . . . .	152
15.2	Essential Extensions . . . . .	156
15.3	Existence of Injectives . . . . .	158
15.4	An Embedding Theorem . . . . .	163
15.5	Problems . . . . .	165
16.	Adjoint Functors . . . . .	166
16.1	Composition of Functors and Natural Transformations . . . . .	166
16.2	Equivalences of Categories . . . . .	167
16.3	Skeletons . . . . .	170
16.4	Adjoint Functors . . . . .	173
16.5	Quasi-inverse Adjunction Transformations . . . . .	175
16.6	Fully Faithful Adjoints . . . . .	179
16.7	Tensor Products . . . . .	184
16.8	Problems . . . . .	186
17.	Pairs of Adjoint Functors between Functor Categories . . . . .	188
17.1	The Kan Construction . . . . .	188
17.2	Dense Functors . . . . .	196
17.3	Characterization of the Yoneda Embedding . . . . .	200

17.4	Small Projective Objects . . . . .	203
17.5	Finitely Generated Objects . . . . .	208
17.6	Natural Transformations with Parameters . . . . .	210
17.7	Tensor Products over Small Categories . . . . .	212
17.8	Relatives of the Tensor Product . . . . .	216
17.9	Problems . . . . .	218
18.	Principles of Universal Algebra . . . . .	220
18.1	Algebraic Theories . . . . .	220
18.2	Yoneda Embedding and Free Algebras . . . . .	225
18.3	Subalgebras and Cocompleteness . . . . .	229
18.4	Coequalizers and Kernel Pairs . . . . .	231
18.5	Algebraic Functors and Left Adjoints . . . . .	238
18.6	Semantics and Structure . . . . .	241
18.7	The Kronecker Product . . . . .	246
18.8	Characterization of Algebraic Categories . . . . .	249
18.9	Problems . . . . .	255
19.	Calculus of Fractions . . . . .	256
19.1	Categories of Fractions . . . . .	256
19.2	Calculus of Left Fractions . . . . .	258
19.3	Factorization of Functors and Saturation . . . . .	263
19.4	Interrelation with Subcategories . . . . .	268
19.5	Additivity and Exactness . . . . .	272
19.6	Localization in Abelian Categories . . . . .	278
19.7	Characterization of Grothendieck Categories with a Generator . . . . .	283
19.8	Problems . . . . .	289
20.	Grothendieck Topologies . . . . .	291
20.1	Sieves and Topologies . . . . .	291
20.2	Covering Morphisms and Sheaves . . . . .	294
20.3	Sheaves Associated with a Presheaf . . . . .	299
20.4	Generation of Topologies . . . . .	307
20.5	Pretopologies . . . . .	309
20.6	Characterization of Topos . . . . .	311
20.7	Problems . . . . .	318
21.	Triples . . . . .	319
21.1	The Construction of Eilenberg and Moore . . . . .	319
21.2	Full Image and Kleisli Categories . . . . .	325
21.3	Limits and Colimits in Eilenberg-Moore Categories . . . . .	331
21.4	Split Forks . . . . .	338
21.5	Characterization of Eilenberg-Moore Situations . . . . .	341
21.6	Consequences of Factorizations of Morphisms . . . . .	350
21.7	Eilenberg-Moore Categories as Functor Categories . . . . .	364
21.8	Problems . . . . .	372
	Bibliography . . . . .	375
	Index . . . . .	378
