

Inhalt

V. A. ANDRUNAKIEVIČ, JU. M. Rjabuhin, K. K. KRAČILOV, E. I. TÈBYRCÈ	1
Erbliche Radikale von Algebren (Torsionen von Algebren)	
L. BUDACH	
Radicals in Abelian Categories	9
N. JACOBSON	
Some Recent Developments in the Theory of PI-algebras	17
K. KEIMEL, H. WERNER	
STONE Dualität für primitive Klassen, die von quasi-primalen Algebren erzeugt werden (Zusammenfassung)	23
J. LAMBEK, B. A. RATTRAY	
Localization and Sheaf Reflectors (Abstract)	29
PETR NĚMEC	
General Theory of Preradicals	31
LADISLAV BICAN	
General Concept of Injectivity	37
TOMÁŠ KEPKA	
Torsion Theories and Homological Dimensions	41
JIŘÍ ROSICKÝ	
Extensions of Full Embeddings and Binding Categories	45
B. M. SCHEIN	
On Semigroup Radicals	49
DANIEL SIMSON	
Pure Homological Dimension	55
L. A. SKORNJAKOV	
Radikale in Bikategorien	57
BO STENSTRÖM	
The Maximal Ring of Quotients of a General Matrix Ring	65
REINHARD STRECKER	
Über das Radikal links-archimedischer Halbgruppen	69
A. V. TISHCHENKO	
Special and Weakly Special Radicals in Semigroups. U-semisimple Semigroups with some Minimum Condition	71
RICHARD WIEGANDT	
A General Radical Theory and its Application in Topology and Graph Theory	77
BRIAN DAVEY	
Duality for Quasi-Varieties (Abstract) (Presented by HEINRICH WERNER at the „Internationale Winterschule für Universale Algebren und Theorie der Radikale“ in Reinhardtsbrunn, Thüringen, 26. January – 9. February 1974)	85
