

Table of Contents

Preface	IX
PART I: CONSTRUCTS	1
Chapter 1: Objects and Morphisms	2
1A Sets	2
1B Constructs: Definition and Examples	4
1C Isomorphisms	13
1D Fibres	21
1E Isomorphic Constructs	29
1F Subobjects and Generation	35
1G Quotient Objects	40
1H Free Objects	48
Chapter 2: Initial and Final Structures	57
2A Initial Structures	57
2B Cartesian Products	66
2C Final Structures	78
2D Semifinal Objects	82
2E A Criterion for Semifinal Completeness	92
PART II: CATEGORIES AND FUNCTORS	101
Chapter 3: Categories	102
3A The Definition of a Category	102
3B The Duality Principle	106
3C Functors	113
3D The Construct of Small Categories	121
3E Natural Transformations	127
3F Adjoint Functors	138
Chapter 4: Limits and Colimits	149
4A Products and Coproducts	149
4B Limits	157
4C Colimits	169
4D Adjoint Functor Theorem	179
4E Reflective Subcategories	193
4F Tensor Products	204

PART III: SELECTED TOPICS	225
Chapter 5: Relational and Algebraic Structures	226
5A Set Functors	227
5B Relational Structures	238
5C Algebraic Structures	253
5D The Birkhoff Variety Theorem	265
Chapter 6: Concrete Categories	275
6A Which Categories are Concrete	275
6B The Kučera Theorem	290
6C Universal Constructs	294
References	310
List of Constructs and Categories	312
List of Functors and Other Symbols	313
Subject Index	314
