

INTRODUCTION	1
<u>CHAPTER 1 : CATEGORIES OF BOOLEAN SHEAVES OF ALGEBRAS</u>	19
1.0. Locally finitely presentable categories	19
1.1. Locally indecomposable categories	19
1.2. Examples of locally indecomposable categories	20
1.3. The direct factors classifier	22
1.4. Finitely presentable objects	26
1.5. Indecomposable objects	27
1.6. Indecomposable components of an object	28
1.7. The indecomposable spectrum of an object and its structural sheaf	30
1.8. Morphisms of locally indecomposable categories	34
1.9. Full locally indecomposable subcategories	37
1.10. Locally indecomposable categories of fractions	39
1.11. Locally indecomposable categories of algebras	42
1.12. Locally indecomposable categories of coalgebras for a comonad	44
<u>CHAPTER 2 : CATEGORIES OF BOOLEAN SHEAVES OF SIMPLE ALGEBRAS</u>	48
2.1. Locally simple categories	48
2.2. Examples of locally simple categories	51
2.3. Locally simple categories of functors	53
2.4. The algebraic nature of locally simple categories	56
2.5. Equivalence relations on an object	59
2.6. The maximal spectrum of an object and its structural sheaf	61
2.7. Boolean sheaves of simple objects	63
2.8. Morphisms of locally simple categories	64
2.9. Monadic morphisms	66
2.10. Locally simple varieties	70
2.11. Locally simple algebraic theories	75
2.12. Totally separated boolean sheaves of algebras	78
2.13. Locally simple categories of coalgebras for a comonad	81
2.14. Continuous representation of profinite groups	84
2.15. Locally Noetherian locally simple categories	91

2.16.	Locally preGalois categories	99
2.17.	Locally Galois categories	110

<u>CHAPTER 3 : CATEGORIES OF LOCALLY BOOLEAN SHEAVES OF SIMPLE ALGEBRAS</u>		114
3.1.	Quasi locally simple categories	114
3.2.	Quasi locally simple categories of augmented objects	119
3.3.	Quasi locally simple categories of functors	123
3.4.	Locally boolean sheaves of simple objects	124
3.5.	Normal subobjects	129
3.6.	Objects of finite type	137
3.7.	Morphisms of quasi locally simple categories	142
3.8.	The 2-equivalence between quasi locally simple categories and locally simple categories	146
3.9.	Representation of objects by locally boolean sheaves of simple objects	148
3.10.	Quasi locally simple monads	152
3.11.	Quasi locally simple quotient categories	156
