

Table of Contents

Introduction	1
Preliminaries	4
Chapter 1. Algebraic theories of Sets	7
1. Finitary Universal Algebra	7
2. The Clone of an Equational Presentation	15
3. Algebraic Theories	24
4. The Algebras of a Theory	32
5. Infinitary Theories	50
Chapter 2. Trade Secrets of Category Theory	82
1. The Base Category	82
2. Free Objects	115
3. Objects with Structure	139
Chapter 3. Algebraic Theories in a Category	161
1. Recognition Theorems	161
2. Theories as Monoids	204
3. Abstract Birkhoff Subcategories	224
4. Regular Categories	234
5. Fibre-Complete Algebra	246
6. Bialgebras	257
7. Colimits	272
Chapter 4. Some Applications and Interactions	280
1. Minimal Algebras: Interactions with Topological Dynamics	280
2. Free Algebraic Theories: the Minimal Realization of Systems	292
3. Nondeterminism	309
Bibliography	341
Index	349
