

CONTENTS

0. Preliminaries	1
1. Summary and Notation	16
2. The Congruence $\mathcal{L} = \mathcal{L}(E)$ Associated with a Normal Subgroup E of a Nonzero Group \mathcal{H} -Class	22
3. The Congruences \mathcal{R} and \mathcal{L} Associated with the Equivalence Relations $\sim_{\mathcal{R}}$ and $\sim_{\mathcal{L}}$	28
4. The Congruence $[\sim_{\mathcal{R}}, E, \sim_{\mathcal{L}}]$ Associated with the Triple $(\sim_{\mathcal{R}}, E, \sim_{\mathcal{L}})$	36
5. Congruences Lying Under \mathcal{H}	41
6. Congruences Lying Under \mathcal{L} and \mathcal{R}	44
7. The Correspondence Between Proper Congruences and Permissible Triples	49
8. The Lattice Structure of \mathcal{T}	57
9. The Lattice of Brandt Congruences on S	62
10. Finite Chains of Congruences on S	70
11. Well-ordered Chains of Congruences on S	76
12. Appendix. The Regular Rees Matrix Semigroups	94
References	102
List of Symbols	105
Index	108
