PREFACE	3
CONTENTS	4
SCIENTIFIC PROGRAM	6
LIST OF PARTICIPANTS	9
J. Adámek , The algebraic structure of products and sums in a category	13
H.-J. Bandelt , On complete distributivity and maximal d -intervals in complete lattices	29
J. Doyen – C. Herrmann , Projective lines and n -distributivity ...	45
S. Fajtlowicz – J. Schmidt , Bézout families, join-congruences, and meet-irreducible ideals	51
T. Hecht – T. Katriňák , Free double Stone algebras	77
C. Herrmann – A.P. Huhn , Lattices of normal subgroups which are generated by frames	97
A.P. Huhn , Two notes on n -distributive lattices	137
K. Indermark – W. Reisig , On recursively definable relations	149
J. Jakubík , Pairs of lattices with common congruence relations ...	171
J. Ježek – T. Kepka , Atoms in the lattice of varieties of distributive groupoids	185
B. Jónsson , Identities in congruence varieties	195
M. Kolibiar , Extremal extensions of ordered sets to semilattices ...	207
S. Maeda , Independent complements in lattices	215
S. Maeda , Remarks on the problems in the book: Theory of symmetric lattices	227
P. Mederly , A characterization of modular pseudocomplemented semilattices	231
R.A. Melter – S. Rudeanu , Geometry of 3-rings	249
V.V. Pašenkov , On a duality theorem	271
P. Pudlák – J. Tůma , Yeast graphs and fermentation of algebraic lattices	301
E.T. Schmidt , Lattices generated by partial lattices	343

W. Seibert , On subdirectly irreducible modular lattices of breadth 2	355
M. Sekanina , Orderings of the system of all sublattices of a distributive lattice	379
L.A. Skornjakov , Complements in the congruence lattice of a polygon over a commutative monoid	395
O. Steinfeld , Some remarks on algebraic groupoid-lattices	413
M. Stern , On AC-lattices in which the ideal of the finite elements is neutral	421
T. Traczyk – W. Zarębski , Post algebras are uniquely chain based lattices	427
H. Werner , Which partition lattices are congruence lattices?	433
R. Wille , A note on simple lattices	455
