

<u>Chapter 1 : Categories of algebraic sheaves</u>	1
§ 1 - Algebraic theories	1
§ 2 - Frames	2
§ 3 - Sheaves on a frame	3
§ 4 - Algebraic sheaves (external version)	4
§ 5 - Algebraic sheaves (internal version)	4
§ 6 - Limits and colimits	5
§ 7 - Algebraic Yoneda lemmas	6
§ 8 - Generators	7
§ 9 - Filtered unions	11
<u>Chapter 2 : Formal initial segments</u>	13
§ 1 - Heyting subobjects	14
§ 2 - Algebraic sheaves on an initial segment	20
§ 3 - The frame of formal initial segments	25
§ 4 - Comparison of various frames related to $\text{Sh}(\mathbf{H}, \mathbb{T})$	43
§ 5 - Sheaves on the frame of formal initial segments	46
<u>Chapter 3 : Localizations and algebraic sheaves</u>	52
§ 1 - Some technical lemmas	53
§ 2 - The canonical topos $\mathfrak{E}(\mathbf{H}, \mathbb{T})$	59
§ 3 - The classifying object $\Omega_{\mathbb{T}}$ for algebraic sheaves	60
§ 4 - Classification of subobjects in $\text{Sh}(\mathbf{H}, \mathbb{T})$	63
§ 5 - Universal closure operations on $\text{Sh}(\mathbf{H}, \mathbb{T})$	70
§ 6 - Lawvere - Tierney $\mathbb{T}$ -topologies on $\mathbf{H}$	73
§ 7 - Gabriel - Grothendieck $\mathbb{T}$ -topologies on $\mathbf{H}$	75
§ 8 - Localizing at some $\mathbb{T}$ -topology	79
§ 9 - Classification of the localizations of $\text{Sh}(\mathbf{H}, \mathbb{T})$	94
§ 10 - The case of groups and abelian groups	102

<u>Chapter 4 : Integral theories and characterization theorem</u>	108
§ 1 - A counterexample	108
§ 2 - Integral theories	109
§ 3 - The characterization theorem	116
<u>Chapter 5 : Spectrum of a theory</u>	121
§ 1 - The pure spectrum of an algebraic theory	122
§ 2 - Representation theorem for $\mathbb{T}$ -algebras	127
<u>Chapter 6 : Applications to module theory</u>	128
§ 1 - The classifying object for module theory	128
§ 2 - Pure ideal associated to a formal initial segment	130
§ 3 - Formal initial segment associated to a pure ideal	133
§ 4 - Pure spectra of a ring	136
§ 5 - Pure representation of a module	137
<u>Chapter 7 : Pure representation of rings</u>	139
§ 1 - Pure ideals of a ring	141
§ 2 - Examples of pure ideals	153
§ 3 - Pure spectrum of a ring	156
§ 4 - Examples of pure spectra	160
§ 5 - First representation theorem	165
§ 6 - Second representation theorem	169
§ 7 - A counterexample for pure sheaf representations	180
§ 8 - Pure ideals in products of rings	184
§ 9 - Change of base ring	188
<u>Chapter 8 : Gelfand rings</u>	194
§ 1 - Gelfand rings	195
§ 2 - Pure part of an ideal in a Gelfand ring	197
§ 3 - Characterizations of Gelfand rings	205
§ 4 - Pure spectrum of a Gelfand ring	209
§ 5 - Pure representation of a Gelfand ring	212
§ 6 - Change of base ring	218
§ 7 - Examples of Gelfand rings	220
