PART I INTRODUCTION TO LINEAR ORDERINGS

Chapter 1 Introduction

- | | |
|--|----|
| 1. Basic Definitions | 3 |
| 2. Relations between Linear Orderings | 6 |
| 3. Characteristics of Linear Orderings | 10 |
| 4. Operations on Linear Orderings | 14 |
| 5. Countable Linear Orderings | 23 |

Chapter 2 Dense Linear Orderings

- | | |
|--|----|
| 1. Dense Linear Orderings | 25 |
| 2. Countable Dense Linear Orderings; Properties of η | 26 |
| 3. Scattered Linear Orderings | 32 |
| 4. Uncountable Dense Linear Orderings; Completeness; Properties of λ and θ | 33 |

Chapter 3 Well-Orderings and Ordinals

- | | |
|---------------------------------------|----|
| 1. Well-Orderings | 41 |
| 2. Ordinals and Cardinal Numbers | 47 |
| 3. Ordinals and Induction | 52 |
| 4. The Arithmetic of Ordinals | 59 |
| 5. Continuous Functions | 62 |
| 6. The Arithmetic of Cardinal Numbers | 64 |
| References | 66 |

PART II **COMBINATORIAL ASPECTS OF LINEAR ORDERINGS**

Chapter 4 Condensing Linear Orderings

| | |
|------------------------------------|----|
| 1. Condensations and Homomorphisms | 69 |
| 2. The Condensation c_F | 71 |
| 3. The Condensation c_W | 72 |
| 4. The Condensation c_S | 74 |
| References | 75 |

Chapter 5 Hausdorff's Theorem

| | |
|--------------------------------|----|
| 1. Introduction | 76 |
| 2. Iterated Condensations | 79 |
| 3. Hausdorff's Theorem | 84 |
| 4. \mathbb{Z} and Its Powers | 90 |
| References | 92 |

Chapter 6 The Ehrenfeucht–Fraïssé Game

| | |
|-------------------------|-----|
| 1. The Play of the Game | 93 |
| 2. Games and Ordinals | 105 |
| References | 109 |

Chapter 7 Ramsey's Theorem and Ehrenfeucht Games

| | |
|--|-----|
| 1. Ramsey's Theorem | 110 |
| 2. The Theorem of Läuchli and Leonard for Scattered Linear Orderings | 113 |
| 3. Dense Partitions of η ; The Shuffle Operation | 115 |
| 4. The Theorem of Läuchli and Leonard | 118 |
| References | 120 |

Chapter 8 Transitive Linear Orderings

| | |
|---|-----|
| 1. Transitive Linear Orderings | 121 |
| 2. The Order Types of Ordered Abelian Groups | 124 |
| 3. Lexicographic Products and the Order Type of the Irrationals | 127 |

| | |
|--|-----|
| 4. Transitivity and the Exponentiation of Linear Orderings | 130 |
| 5. Automorphisms of Linear Orderings | 132 |
| 6. Almost Transitive Linear Orderings | 136 |
| References | 143 |

Chapter 9 Uncountable Dense Linear Orderings

| | |
|---|-----|
| 1. Diagonal Arguments and the Theorem of Dushnik and Miller | 145 |
| 2. The Theorems of Sierpinski | 152 |
| 3. Suborderings of λ , Continued | 155 |
| 4. η_α -Orderings | 163 |
| References | 171 |

Chapter 10 Embeddings of Linear Orderings and Fraïssé's Conjecture

| | |
|---|-----|
| 1. Indecomposable Order Types | 174 |
| 2. Fraïssé's Results and Conjectures | 177 |
| 3. Well-Quasi-Orderings | 183 |
| 4. Better-Quasi-Orderings | 188 |
| 5. Additively Indecomposable Linear Orderings and Fraïssé's Conjecture | 196 |
| References | 203 |

Chapter 11 Partition Theorems 205

| | |
|---|-----|
| References and Bibliography on Partition Theorems | 216 |
|---|-----|

PART III LOGICAL ASPECTS OF LINEAR ORDERINGS

Chapter 12 Linear Orderings and Formal Languages

| | |
|---------------------------------------|-----|
| 1. Introduction | 223 |
| 2. First-Order Languages | 229 |
| 3. Infinitary Languages | 236 |
| 4. Second-Order Languages | 240 |
| 5. Algorithms and Decision Procedures | 241 |
| References | 246 |

Chapter 13 **The First-Order Theory of Linear Orderings**

| | |
|---|-----|
| 1. The Ehrenfeucht–Fraïssé Games and First-Order Theories | 247 |
| 2. The Ehrenfeucht Games and the First-Order Theory of Linear Orderings | 253 |
| 3. Decidability of First-Order Theories of Linear Orderings | 267 |
| 4. Model Theory and Linear Orderings | 273 |
| 5. The Number of Countable Models of a Complete Theory | 296 |
| 6. Finitely Axiomatizable Linear Orderings | 325 |
| References | 342 |

Chapter 14 **The Infinitary Theories of Linear Orderings**

| | |
|--|-----|
| 1. The Expressive Power of $L_{\omega_1, \omega}$ and $L_{\infty, \omega}$ | 344 |
| 2. The Karp Game | 349 |
| 3. Scott Sentences | 358 |
| 4. Completely Characterizable Linear Orderings | 363 |
| 5. Additional Results | 367 |
| References | 369 |

Chapter 15 **The Second-Order Theories of Linear Orderings**

| | |
|--|-----|
| 1. The Generalized Ehrenfeucht Games | 370 |
| 2. The Generalized Ehrenfeucht Game and the Weak Second-Order Theory of Linear Orderings | 378 |
| 3. Decidability of the Weak Second-Order Theory of Linear Orderings | 383 |
| 4. The Monadic Second-Order Theory of Linear Orderings | 396 |
| References | 399 |

Chapter 16 **Linear Orderings and Recursion Theory**

| | |
|--|-----|
| 1. Introduction | 401 |
| 2. Looking at Q Effectively | 405 |
| 3. Recursive Linear Orderings | 409 |
| 4. The Arithmetical Hierarchy | 414 |
| 5. Recursive Linear Orderings and the Arithmetical Hierarchy | 421 |

| | |
|---|-----|
| 6. Diagonal Arguments in Recursion Theory | 435 |
| 7. Effective Versions of Combinatorial Theorems | 438 |
| References | 454 |

| | |
|--|-----|
| Complete Bibliography of Linear Orderings | 456 |
|--|-----|

| | |
|-------------------------|-----|
| <i>List of Notation</i> | 477 |
| <i>Author Index</i> | 479 |
| <i>Subject Index</i> | 482 |
