

TABLE OF CONTENTS

<u>Chapter 1:</u> Historical Setting . . . . .	1
<u>Chapter 2:</u> A Brief Introduction to Graph Theory . . . . .	5
2-1. Definition of a Graph . . . . .	5
2-2. Variations of Graphs . . . . .	6
2-3. Additional Definitions . . . . .	7
2-4. Operations on Graphs . . . . .	10
2-5. Problems . . . . .	12
<u>Chapter 3:</u> The Automorphism Group of a Graph . . . . .	14
3-1. Definitions . . . . .	14
3-2. Operations on Permutation Groups . . . . .	15
3-3. Computing Automorphism Groups of Graphs . . . . .	16
3-4. Graphs with a Given Automorphism Group . . . . .	18
3-5. Other Groups of a Graph . . . . .	18
3-6. Problems . . . . .	19
<u>Chapter 4:</u> The Cayley Color Graph of a Group Presentation. . . . .	21
4-1. Definitions . . . . .	21
4-2. Automorphisms . . . . .	24
4-3. Properties . . . . .	26
4-4. Products . . . . .	29
4-5. Problems . . . . .	33
<u>Chapter 5:</u> An Introduction to Surface Topology . . . . .	34
5-1. Definitions . . . . .	34
5-2. Surfaces and Other 2-Manifolds . . . . .	36
5-3. The Characteristic of a Surface . . . . .	37
5-4. Two Applications . . . . .	42
5-5. Pseudosurfaces . . . . .	48
5-6. Problems . . . . .	48
<u>Chapter 6:</u> Imbedding Problems in Graph Theory . . . . .	50
6-1. Answers to Some Imbedding Questions . . . . .	51
6-2. Definition of "Imbedding" . . . . .	53
6-3. The Genus of a Graph . . . . .	53
6-4. The Maximum Genus of a Graph . . . . .	56
6-5. Genus Formulae for Graphs . . . . .	59
6-6. Edmonds' Permutation Technique . . . . .	61
6-7. Imbedding Graphs on Pseudosurfaces . . . . .	63
6-8. Other Topological Parameters for Graphs . . . . .	64
6-9. Applications . . . . .	66
6-10. Problems . . . . .	68
<u>Chapter 7:</u> The Genus of a Group . . . . .	69
7-1. Imbeddings of Cayley Color Graphs . . . . .	69
7-2. Genus Formulae for Groups . . . . .	74
7-3. Problems . . . . .	79

<u>Chapter 8:</u> Map-Coloring Problems . . . . .	81
8-1. Definitions . . . . .	82
8-2. The Four-Color Conjecture . . . . .	82
8-3. The Five-Color Theorem . . . . .	85
8-4. Other Map-Coloring Problems; The Heawood Map-Coloring Theorem . . . . .	87
8-5. A Related Problem . . . . .	91
8-6. A Four-Color Theorem for the Torus . . . . .	94
8-7. $k$ -Degenerate Graphs . . . . .	97
8-8. Coloring Graphs on Pseudosurfaces . . . . .	99
8-9. Problems . . . . .	100
 <u>Chapter 9:</u> Quotient Graphs and Quotient Manifolds (and Quotient Groups!) . . . . .	 102
9-1. The Genus of $K_n$ . . . . .	102
9-2. The Theory of Quotient Graphs and Quotient Manifolds, as Applied to $K_n$ . . . . .	104
9-3. The Genus of $K_n$ (again). . . . .	108
9-4. Extending the Theory . . . . .	113
9-5. The General Theory . . . . .	119
9-6. Applications to Known Imbeddings . . . . .	124
9-7. New Applications . . . . .	127
9-8. Problems . . . . .	130
 <u>References</u> . . . . .	 131
<u>Bibliography</u> . . . . .	136
<u>Index of Symbols</u> . . . . .	137
<u>Index of Definitions</u> . . . . .	139
