

## TABLE OF CONTENTS

### Invited Addresses

P. Erdős	
Topics in Combinatorial Analysis . . . . .	2
R. L. Graham and B. L. Rothschild	
A Survey of Finite Ramsey Theorems . . . . .	21
B. Grünbaum	
Arrangements of Hyperplanes . . . . .	41
H. J. Ryser	
Recent Activity in Combinatorics . . . . .	107

### Contributed Papers

R. Alter	
Some Remarks and Results on Catalan Numbers . . . . .	109
B. D. Beach and H. C. Williams	
Some Computer Results on Periodic Continued Fractions . . . . .	133
D. W. T. Bean	
Some Results on a Matroid Conjecture of Harary and Welsh . . . . .	147
J. A. Bondy	
Pancyclic Graphs . . . . .	167
F. J. Burkowski and W. D. Hoskins	
The Application of Splines to the Computation of Solutions of Functional Differential Equations . . . . .	173

R. J. Collens and P. H. Dirksen	
Efficient Identification of a Subset using a Collisionless Hashing Function . . . . .	187
W. H. Cunningham	
The Circumference of a Class of Product Graphs . . . .	203
M. Doob	
On the Spectral Characterization of the Line Graph of a BIBD . . . . .	225
R. D. Fray	
Three-dimensional Weighted Lattice Paths . . . . .	235
D. L. Greenwell	
Semi-uniquely Colorable Graphs . . . . .	253
S. Hedetniemi	
Characterizations and Constructions of Minimally Two-connected Graphs and Minimally Strong Digraphs . . . . .	257
P. Hell and A. Rosa	
Handcuffed Prisoners and Balanced P-Designs . . . . .	283
R. L. Hemminger	
More on Line Isomorphisms and Pseudographs . . . . .	297
J. D. Horton	
Quintuplication of Room Squares . . . . .	315
L. O. James, R. G. Stanton, and D. D. Cowan	
Some Results on Tree Numbers . . . . .	317
P. C. Kainen	
Trivalent Descriptions of Graphs . . . . .	331
D. G. Gryte, R. A. Kingsley, and H. C. Williams	
On Certain Forms of Fibonacci Numbers . . . . .	339

F. Galvin and M. M. Krieger	
The Minimum Number of Cliques in a Graph and Its Complement . . . . .	345
J. F. Lawless	
Pairwise Balanced Designs and the Construction of Certain Combinatorial Systems . . . . .	353
R. B. Levow	
A Graph Theoretic Solution to a Problem of Marshall Hall . . . . .	367
R. C. Mullin and R. G. Stanton	
Construction of Room Squares from Orthogonal Latin Squares . . . . .	375
U. S. R. Murty	
On the Number of Bases of a Matroid . . . . .	387
L. T. Ollmann and K. B. Reid	
Edge Sets Generated by Symmetric Difference . . . . .	411
M. D. Plummer	
On Path Properties Versus Connectivity I . . . . .	457
K. B. Reid	
$\ell$ -cycles in Tournaments having no $k$ -cycles . . . . .	473
J. W. Reilly and R. G. Stanton	
Variable Strings with a Fixed Substring . . . . .	483
J. D. Horton, R. C. Mullin, and R. G. Stanton	
Minimal Coverings of Pairs by Quadruples . . . . .	495
R. S. D. Thomas	
An Algorithm for Combing Braids . . . . .	517

H. C. Williams	
An Algorithm for Determining Certain Large Primes . . .	533
J. Zaks	
The Chair Theorem . . . . .	557
C. R. Zarnke and H. C. Williams	
Computer Determination of Some Large Primes . . . . .	563
