Foreword by D. R. Fulkerson	ix
Preface	xi
Chapter 1. The Circuits of a Matroid	1
1.1. Introduction	1
1.2. Chain-Groups	2
1.3. Graphs	6
1.4. Orthogonality	10
Chapter 2. Minors	13
2.1. Subgraphs and Contractions	13
2.2. Minors of Chain-Groups	14
2.3. Minors of Matroids	17
2.4. Rank	19
2.5. Ranks of Minors	22
2.6. Ranks of Chain-Groups	23
2.7. The Ranks of $P(G)$ and $B(G)$	24
Chapter 3. Connection	27
3.1. Separators	27
3.2. Separable and Nonseparable Graphs	28
3.3. Connected Flats	32
3.4. Linear Subclasses	36
Chapter 4. Bridges	41
4.1. Bridges	41
4.2. Bridges in Binary Matroids	43

Chapter 4. Bridges (Continued)	
4.3. Skewness.	44
4.4. Bridges in Polygon-Matroids	47
4.5. Bridges in Bond-Matroids	49
4.6. Bridges of Collinear Circuits	53
Chapter 5. Regular Chain-Groups and Matroids	57
5.1. Representative Matrices	57
5.2. Representative Matrices of Regular Chain-Groups.	60
5.3. Algorithms	63
5.4. Bridges in Regular Matroids	64
5.5. Totally Bridge-Separable Circuits	67
Chapter 6. Duality and Homotopy	71
6.1. Note on the Preceding Chapters	71
6.2. Duality	71
6.3. Homotopy	72
6.4. The Homotopy Theorem.	75
6.5. Graphic Matroids.	77
6.6. Three-Connected Matroids	77
References	81
Index	83
