

Contents

| | |
|---------------------------------------|-----|
| PART I - INTRODUCTION | 1 |
| 1. An Historical Introduction | 2 |
| 2. Basic Definitions and Examples | 5 |
| 3. Vertex-Colourings of Graphs | 12 |
| PART II - THE CHROMATIC INDEX | 21 |
| 4. The Chromatic Index | 22 |
| 5. The Theorems of Vizing and Shannon | 30 |
| 6. The Classification Problem | 36 |
| 7. Petersen-type Graphs | 42 |
| 8. Regular Graphs | 51 |
| 9. Some Applications | 57 |
| PART III - CRITICAL GRAPHS | 65 |
| 10. Critical Graphs | 66 |
| 11. The Structure of Critical Graphs | 71 |
| 12. Constructions for Critical Graphs | 79 |
| 13. Bounds on the Number of Edges | 85 |
| 14. Critical Graphs of Small Order | 92 |
| 15. The Critical Graph Conjecture | 99 |
| PART IV - FURTHER TOPICS | 105 |
| 16. Planar Graphs | 106 |
| 17. Circuit Length in Critical Graphs | 111 |
| 18. Uniquely Colourable Graphs | 117 |
| 19. The Multichromatic Index | 123 |
| Guide to the Bibliography | 131 |
| Bibliography | 134 |
| Index of Names | 151 |
| Index of Definitions | 153 |
