

CONTENTS

Preface	I
Chapter 1: <i>Combinatorial and algebraic foundations</i>	1
1.1 Matroids	1
1.2 Regular matroids	8
1.3 Examples for regular and non-regular matroids	16
1.4 Ordered semigroups $(H, *, \leq)$	22
1.5 Examples of ordered semigroups	27
Chapter 2: <i>Maximal M-flows</i>	33
2.1 The Max M-Flow - Min Cocircuit Theorem and the Augmenting Circuit Algorithm	33
2.2 Decomposition of M-flows	41
2.3 Incremental matroids	45
2.4 Differences of M-flows	51
Chapter 3: <i>M-flows with lower capacities</i>	55
3.1 Determining maximal and minimal admissible M-flows	56
3.2 Admissibility Theorem and an algorithm for determining admissible M-flows	61
3.3 Decomposition of M-flows with lower capacity functions	65
Chapter 4: <i>Minimal cost M-flows</i>	69
4.1 Negative Circuit Algorithm	70
4.2 Shortest Augmenting Circuit Algorithm	75
4.3 Determining negative and shortest augmenting circuits	77
4.4 Compatibility Matroid Algorithm	82
4.5 Transformation Method	85

Chapter 5:	<i>First application of the theory of M-flows: Algebraic flows in graphs</i>	94
5.1	Foundations	94
5.2	Maximal algebraic flows in graphs	97
5.2.1	Algebraic Max-Flow Min-Cut Theorem	99
5.2.2	Decomposition of algebraic flows	102
5.2.3	Incremental graphs and layered graph algorithms	102
5.2.4	Difference of flows in graphs	105
5.3	Flows in graphs with lower capacity function	106
5.3.1	Maximal and minimal admissible flows	107
5.3.2	Admissibility Theorem	110
5.3.3	Decomposition of flows in graphs	113
5.4	Minimal cost flows in graphs	115
5.4.1	Negative Circuit Algorithm	115
5.4.2	Shortest Augmenting Path Algorithm	117
5.4.3	Determining negative and shortest augmenting circuits by means of node functions	118
5.4.4	Compatibility graphs	121
5.4.5	Transformation Method	125
Chapter 6:	<i>Second application of the theory of M-flows: Lexicographical M-flow problems</i>	128
6.1	The problem and its algebraic solution	128
6.2	Reduction to real-valued M-flow problems	131
6.3	Combinatorial comparison of the solution methods	138
6.4	Applications: Optimal cuts and shortest paths	140
Appendix 1:	<i>Graph-theoretical definitions and denotations</i>	145
Appendix 2:	<i>List of symbols</i>	147
