<i>Preface to the third edition</i>	ix
1 Introduction to graphs	1
1.1 Graphs	1
1.2 Degree sequences	11
1.3 Distance in graphs	16
1.4 Digraphs and multigraphs	25
2 Structure and symmetry of graphs	33
2.1 Cut-vertices, bridges and blocks	33
2.2 The automorphism group of a graph	40
2.3 Cayley color graphs	45
2.4 The Reconstruction Problem	50
3 Trees and connectivity	57
3.1 Elementary properties of trees	57
3.2 Arboricity and vertex-arboricity	68
3.3 Connectivity and edge-connectivity	74
3.4 Menger's theorem	79
3.5 Vulnerability of graphs	86
4 Eulerian and hamiltonian graphs and digraphs	92
4.1 Eulerian graphs and digraphs	92
4.2 Hamiltonian graphs and digraphs	103
4.3 Line graphs and powers of graphs	122
5 Directed graphs	131
5.1 Connectedness of digraphs	131
5.2 Tournaments	138
5.3 Hamiltonian tournaments	149
6 Planar graphs	154
6.1 Euler's Formula	154
6.2 Characterizations of planar graphs	161
6.3 Hamiltonian planar graphs	169
6.4 Crossing number and thickness	174

7	Graph embeddings	183
7.1	The genus of a graph	183
7.2	2-cell embeddings of graphs	191
7.3	The maximum genus of a graph	207
7.4	Voltage graphs	214
8	Graph colorings	220
8.1	Vertex colorings	220
8.2	Edge colorings	236
8.3	Map colorings and flows	246
9	Matchings, factors and decompositions	259
9.1	Matchings and independence in graphs	259
9.2	Factorizations and decompositions	272
9.3	Labelings of graphs	288
10	Domination in graphs	302
10.1	The domination number of a graph	302
10.2	The independent domination number of a graph	312
10.3	Other domination parameters	317
11	Extremal graph theory	329
11.1	Turán's theorem	329
11.2	Extremal results on graphs	334
11.3	Cages	343
12	Ramsey theory	351
12.1	Classical Ramsey numbers	351
12.2	Generalized Ramsey theory	357
12.3	Other Ramsey numbers	363
13	The probabilistic method in graph theory	370
13.1	The probabilistic method	370
13.2	Random graphs	376
	<i>Glossary of symbols</i>	382
	<i>Graph theory books 1936–1996</i>	385
	<i>References</i>	392
	<i>Index</i>	415
