

# TABLE OF CONTENTS

|   |     |
|---|-----|
| Foreword  | v   |
| A Survey of the Cycle Double Cover Conjecture<br>F. Jaeger  | 1   |
| A Girth Requirement for the Double Cycle Cover Conjecture<br>L. Goddyn  | 13  |
| Hamilton Cycles in Metacirculant Graphs with Prime Cardinality Blocks<br>B. Alspach, E. Durnberger and T.D. Parsons | 27  |
| Hamilton Paths in Cartesian Products of Directed Cycles<br>S.J. Curran and D. Witte                                 | 35  |
| Every Connected Cayley Graph of a Group with Prime Order Commutator<br>Group Has a Hamilton Cycle<br>E. Durnberger  | 75  |
| Multiple-Ply Hamiltonian Graphs and Digraphs<br>K. Keating  | 81  |
| On Hamilton Cycles in Cayley Graphs in Groups with Cyclic<br>Commutator Subgroup<br>K. Keating and D. Witte         | 89  |
| Hamilton Circuits in Cartesian Products with a Metacyclic Factor<br>G. Letzter                                      | 103 |
| Vertex Transitive Graphs and Digraphs of Order $p^k$<br>D. Marušič  | 115 |
| Some Hamiltonian Cayley Graphs<br>D.L. Powers   | 129 |
| On Hamilton Cycles in 3-Connected Cubic Maps<br>L. Bruce Richmond, R.W. Robinson and N.C. Wormald                   | 141 |
| Non-Hamiltonian 3-Polytopes Whose Faces Are All Pentagons<br>P.J. Owens   | 151 |
| Hamilton Circuits in Regular Tournaments<br>C. Thomassen  | 159 |
| Circuits and Hamilton Circuits in Domination Orientable Tournaments<br>C.-Q. Zhang                                  | 163 |

|   |     |
|---|-----|
| First Occurrence of Hamilton Cycles in Random Graphs<br>M. Ajtai, J. Komlós and E. Szemerédi  | 173 |
| The Pancyclicity of Halin Graphs and their Exterior Contractions<br>M. Skowrońska   | 179 |
| Long Paths between Specified Vertices of a Block<br>J.A. Bondy and B. Jackson   | 195 |
| Longest Cycles in 2-Connected Graphs of Independence Number $\alpha$<br>I. Fournier   | 201 |
| A Note on Maximal Cycles in 2-Connected Graphs<br>R. Häggkvist and B. Jackson   | 205 |
| A Note on Isomorphic Generalized Prisms<br>S.P. Mohanty and D. Rao  | 209 |
| Uniformly $n$ -Cyclic Graphs<br>D. Wagner   | 215 |
| Cycles in 3-Connected Cubic Planar Graphs<br>D.A. Holton  | 219 |
| A Lemma on Cycle Decompositions<br>R. Häggkvist   | 227 |
| A Note on Hamilton Cycles<br>R. Häggkvist   | 233 |
| A Counterexample to a Conjecture about Oriented Graphs<br>L. Goddyn   | 235 |
| An Improvement of Jackson's Result on Hamilton Cycles in 2-Connected<br>Regular Graphs<br>Z. Yongjin, L. Zhenhong and Y. Zhengguang | 237 |
| Finding Cycles of a Given Length<br>D. Richards and A.L. Liestman   | 249 |
| Clique Coverings of Complements of Paths and Cycles<br>D. de Caen, D.A. Gregory and N.J. Pullman                                    | 257 |
| Equicardinal Disjoint Cycles in Sparse Graphs<br>R. Häggkvist   | 269 |
| Path and Cycle Decompositions of Complete Multigraphs<br>K. Heinrich and G.M. Nonay   | 275 |
| Minimum Number of Circuits Covering the Vertices of a Strong Digraph<br>M.C. Heydemann  | 287 |
| On Decomposing Graphs into Isomorphic Uniform 2-Factors<br>J.D. Horton, B.K. Roy, P.J. Schellenberg and D.R. Stinson                | 297 |
| Two Complementary Circuits in Two-Connected Tournaments<br>K.B. Reid  | 321 |
| The Clique Partition Number of the Complement of a Cycle<br>W.D. Wallis   | 335 |

|   |     |
|---|-----|
| The Computational Complexity of Decomposing Block Designs<br>C.J. Colbourn and M.J. Colbourn              | 345 |
| Kotzig's Conjecture on Generalized Friendship Graphs - A Survey<br>J.A. Bondy                             | 351 |
| A Short Proof of Rubin's Block Theorem<br>R.C. Entringer  | 367 |
| Cycle Basis Interpolation Theorems<br>F. Harary, E. Kolaszińska and M.M. Sysło                            | 369 |
| A Basis for the Cycle Space of a 3-Connected Graph<br>S.C. Locke  | 381 |
| Types of Cycles in Hypergraphs<br>R. Duke   | 399 |
| Parity of Cycles Containing Specified Edges<br>W.D. McCuaig and M. Rosenfeld                              | 419 |
| An Optimal Algorithm for Directing Triple Systems Using Eulerian Circuits<br>J.J. Harms and C.J. Colbourn | 433 |
| The Reconstruction Conjecture for Balanced Signed Graphs<br>F. Harary                                     | 439 |
| Periodic Points of Small Periods of Continuous Mappings of Trees<br>W. Imrich                             | 443 |
| Periodic Points of Continuous Mappings of Trees<br>W. Imrich and R. Kalinowski                            | 447 |
| Unsolved Problems   | 461 |
