Preface and introductory remarks . . . . .	3
Part I: Hamiltonian properties of products of undirected graphs	7
1. Basic definitions and notations . . . . .	7
2. Hamiltonian cycles and Hamiltonian paths . . . . .	11
2.1 The Cartesian sum . . . . .	11
2.2 Other products . . . . .	21
3. Generalized Hamiltonian properties . . . . .	31
3.1 Properties related to Hamiltonicity . . . . .	31
3.2 Pancyclicity . . . . .	40
4. Decomposition into edge-disjoint Hamiltonian cycles . . . . .	48
4.1 The Cartesian sum . . . . .	48
4.2 Other products . . . . .	54
5. Generalizations of the classical products . . . . .	57
6. References . . . . .	66
7. Index of definitions . . . . .	70
8. Index of notations . . . . .	71
Part II: Hamiltonian properties of products of digraphs . . . . .	74
9. Basic definitions and notations . . . . .	74
10. $r$ -Hamiltonian properties . . . . .	78
10.1 Traceability . . . . .	79
10.2 Homogeneous traceability . . . . .	88
10.3 Hamiltonicity . . . . .	97
10.4 Hamiltonian connectedness . . . . .	100
11. Products of Cayley digraphs . . . . .	109
11.1 The Cartesian sum . . . . .	111
11.1.1 Directed cycles . . . . .	111
11.1.2 Other Cayley digraphs . . . . .	115
11.2 The Cartesian product . . . . .	121
12. Strong path-connectedness . . . . .	125
13. Pancyclic properties . . . . .	134
14. References . . . . .	142
15. Index of definitions . . . . .	144
16. Index of notations . . . . .	145
