<b>Preface</b>	<b>ix</b>
<b>Remembering Uncle Paul</b>	<b>xi</b>
<b>Acknowledgements</b>	<b>xiii</b>
<b>CHAPTER 1. Introduction</b>	<b>1</b>
1.1. Definitions and Notation	2
1.2. About the References	3
<b>CHAPTER 2. Ramsey Theory</b>	<b>5</b>
2.1. Introduction	5
2.2. Origins	5
2.3. Classical Ramsey Theory	8
2.4. Graph Ramsey Theory	15
2.5. Multicolored Ramsey Numbers	21
2.6. Size Ramsey Numbers	25
2.7. Induced Ramsey Numbers	29
2.8. Ramsey Theory for Hypergraphs	30
<b>CHAPTER 3. Extremal Graph Theory</b>	<b>33</b>
3.1. Introduction	33
3.2. Origins	33
3.3. Turán Numbers for Bipartite Graphs	36
3.4. Turán Problems for Even Cycles and Their Generalizations	39
3.5. General Extremal Problems	44

<b>CHAPTER 4. Coloring, Packing, and Covering</b>	<b>57</b>
4.1. Introduction	57
4.2. Origins	58
4.3. Chromatic Number and Girth	60
4.4. Chromatic Numbers and Cliques	61
4.5. List Colorings	62
4.6. Critical Graphs	65
4.7. Chromatic Index	67
4.8. General Coloring Problems	68
4.9. Covering and Packing	70
<b>CHAPTER 5. Random Graphs and Graph Enumeration</b>	<b>73</b>
5.1. Introduction	73
5.2. Origins	74
5.3. The Chromatic Number of a Random Graph	79
5.4. General Problems on Random Graphs	81
5.5. Subgraph Enumeration	83
<b>CHAPTER 6. Hypergraphs</b>	<b>89</b>
6.1. Introduction	89
6.2. Origins	90
6.3. Turán Problems for Hypergraphs	92
6.4. Stars	95
6.5. A Problem of Erdős, Faber, and Lovász	97
6.6. Chromatic Hypergraphs	99
6.7. General Hypergraph Problems	102
<b>CHAPTER 7. Infinite Graphs</b>	<b>109</b>
7.1. Origins	109
7.2. Introduction	111
7.3. Ordinary Partition Relations for Ordinals	112
7.4. Chromatic Numbers and Infinite Graphs	113
7.5. General Problems for Infinite Graphs	115
<b>Erdős Stories as told by Andy Vázsonyi</b>	<b>119</b>
Paul Erdős, The World's Most Beloved Mathematical Genius "Leaves"	119
Erdős, Cars and Goats, and Bayes' Theorem	130
Erdős, The Other Woman, and The Theorem of Penta-Chords	131
<b>Index</b>	<b>139</b>
