Foreword	xi
Preface	xiii
Introduction	1
1 Basic concepts	5
1.1 Graphs	5
1.2 Automorphisms and invariants	14
1.3 Hypercubes and isometric subgraphs	19
1.4 The Cartesian product	27
1.5 Graph representations and algorithms	33
1.6 Exercises	44
2 Hypercubes	47
2.1 The Djoković-Winkler relation Θ	47
2.2 An application to chemical graphs	58
2.3 Mulder's convex expansion	64
2.4 Retracts and fixed cubes	73
2.5 Notes	79
2.6 Exercises	81
3 Hamming graphs	84
3.1 Canonical isometric embeddings	84
3.2 A dynamic location problem	91
3.3 Quasi-median graphs	95
3.4 Recognition algorithms	103
3.5 Notes	111
3.6 Exercises	113
4 Cartesian products	115
4.1 Prime factor decompositions	116
4.2 Automorphisms	125
4.3 Fixed box theorems	133
4.4 Notes	143
4.5 Exercises	145

5	Strong and direct products	147
5.1	Strong products and retracts	148
5.2	Factoring strong products	153
5.3	Direct products in Γ and Γ_0	162
5.4	Factoring direct products	167
5.5	Recognition of direct and strong products	178
5.6	Notes	181
5.7	Exercises	182
6	Lexicographic products	184
6.1	Basic algebraic properties	184
6.2	Factorizations and nonuniqueness	193
6.3	Automorphisms	196
6.4	Recognition complexity	200
6.5	Notes	204
6.6	Exercises	205
7	Fast recognition algorithms	207
7.1	Arboricity, squares, and triangles	207
7.2	Fast recognition of median graphs	217
7.3	Triangle-free graphs and median graphs	226
7.4	Fast recognition of Cartesian products	233
7.5	Notes	242
7.6	Exercises	243
8	Invariants	244
8.1	Invariants and standard products	244
8.2	Hedetniemi's conjecture	252
8.3	Coloring lexicographic products	261
8.4	Fractional and circular chromatic number	267
8.5	Shannon capacity	274
8.6	Vizing's conjecture	279
8.7	Notes	287
8.8	Exercises	289
A	Selected results and conjectures	291
A.1	One-factorizations	291
A.2	Hamiltonian decomposable graphs	294
A.3	Perfect graphs	297
A.4	Ultimate independence ratio	300
A.5	Short remarks	301
A.6	Exercises	303

B	Infinite graphs	305
B.1	Trees, partial cubes, and Hamming graphs	306
B.2	Cartesian products	307
B.3	Strong and direct products	309
B.4	Lexicographic products	311
B.5	Exercises	312
C	Other graph products	314
C.1	Simple products	314
C.2	Associative simple products	317
C.3	The modular product	321
C.4	Graph exponentiation	322
C.5	Exercises	323
	Bibliography	324
	Name Index	345
	Subject Index	349
	Symbol Index	357
