

LIST OF CONTENTS

CHAPTER I

THE LOWER PREDICATE CALCULUS

1.1. General introduction	1
1.2. Rules of formation	3
1.3. Rules of deduction	6
1.4. Semantic interpretation	9
1.5. The relation between deductive and descriptive concepts	11
1.6. Sets of sentences and their varieties	20
1.7. Problems	22

CHAPTER II

ALGEBRAIC THEORIES

2.1. Equality	23
2.2. Specification of axiomatic systems	25
2.3. Related sets of sentences	31
2.4. Embedding theorems and transfer principles	34
2.5. Malcev's theory of normal chains	45
2.6. Problems	49

CHAPTER III

SOME CONCEPTS AND METHODS OF MODEL THEORY

3.1. Skolem functions; relativization	51
3.2. The extension of models	54
3.3. The prefix problem	65
3.4. Obstructions to elementary extension	75
3.5. Convex systems	80
3.6. Model-consistency	84
3.7. Problems	86

CHAPTER IV

COMPLETENESS

4.1. A test for completeness	88
4.2. Model-completeness	91
4.3. Relative model-completeness	105
4.4. Problems	110

CHAPTER V

DEFINABILITY

5.1. The consistency lemma	112
5.2. Beth's theorem	117
5.3. Relative definitions	119
5.4. Application to the Nullstellensatz	125
5.5. Model-completion	128
5.6. Problems	137

CHAPTER VI

GENERALIZATION OF ALGEBRAIC CONCEPTS

6.1. Polynomials in general axiomatic systems	139
6.2. Bounded predicates	149
6.3. Algebraic predicates	154
6.4. Algebraic predicates and convex systems	161
6.5. Separability	167
6.6. Problems	171

CHAPTER VII

METAMATHEMATICAL THEORY OF IDEALS

7.1. Introduction	172
7.2. Metamathematical ideals	173
7.3. Connection between ideals in different domains	175
7.4. Disjunctive ideals	179
7.5. Ideals and homomorphisms	185
7.6. Problems	191

CHAPTER VIII

METAMATHEMATICAL THEORY OF VARIETIES

8.1. Varieties of structures	192
8.2. Pre-ideals and their varieties	200
8.3. Metamathematical varieties and algebraic varieties	204
8.4. Differential ideals	209
8.5. Hilbert's seventeenth problem	214
8.6. Problems	224

CHAPTER IX

SELECTED TOPICS

9.1. Introduction of function symbols	226
9.2. The elimination of quantifiers	231

LIST OF CONTENTS

IX

9.3. Direct products and ultraproducts	238
9.4. Non-standard analysis	244
9.5. Non-standard theory of functions of a real variable	252
9.6. Non-standard analysis of functions of several variables	261
9.7. Problems	270
BIBLIOGRAPHY	272
INDEX OF AUTHORS	281
SUBJECT INDEX	283
