Introduction	9
1. Inductive Probability of Generalizations	12
1.1. Inductive Generalizations in Monadic First-Order Logic ..	12
1.2. Statements of Evidence	15
1.3. Carnap's Conception of Inductive Probability	15
1.4. Betting on General Hypotheses in Infinite Universes	23
2. Lawlike Generalizations and Inductive Logic	27
2.1. Characterization of Lawlikeness and Its Degrees	27
2.2. Goodman's Theory of Projection	32
2.3. Credibility Functions and Degrees of Lawlikeness	37
2.4. Pure Induction and the Degree of Regularity of Nature ..	43
2.5. Requirement of the Variety of Instances	46
2.6. Argument by Analogy	48
3. Broad's System of Inductive Logic	53
3.1. Probability of Education and Generalization	53
3.2. Theory of Generators	57
3.3. Johnson's Formula for Education	60
4. Carnap's Continuum of Inductive Methods	62
4.1. Probability of Education and Learning by Pure Induction	62
4.2. λ -Methods and the Variety of Instances	65
4.3. Carnap's Continuum and Reasoning by Analogy	68
4.4. Probability of Inductive Generalization in Carnap's Conti-	
num	69
4.5. On Confirmability of Generalizations	72
5. Hintikka's Two-Dimensional Continuum of Inductive Methods	78
5.1. Probability of Constituents	78
5.2. Inductive Parameters as Representing Regularity Presupp-	
ositions	81
5.3. Probability of Singular Hypotheses in Hintikka's System	86
5.4. (α, λ) -Continuum and the Variety of Instances	88
5.5. (α, λ) -Continuum and Reasoning by Analogy	91

6. Judgements of Irrelevance and Inductive Paradoxes	100
6.1. Paradox of Confirmation	100
6.2. Goodman's Paradox	106
7. Presuppositions of Induction and Inductive Logic	109
7.1. Burks vs. Carnap on Presuppositions	109
7.2. Broad on Natural Kinds	113
8. Two Theories on Lawlikeness	115
8.1. Regularity View of Lawlikeness	115
8.2. Necessity View of Lawlikeness	118
9. Summary and Further Problems	127
