PREFACE	xi
ACKNOWLEDGMENTS	xiii
<b>1. Introduction</b>	
1.1 Artificial Intelligence, Symbolic Logic, and Theorem Proving	1
1.2 Mathematical Background	4
References	5
<b>2. The Propositional Logic</b>	
2.1 Introduction	6
2.2 Interpretations of Formulas in the Propositional Logic	8
2.3 Validity and Inconsistency in the Propositional Logic	10
2.4 Normal Forms in the Propositional Logic	12
2.5 Logical Consequences	15
2.6 Applications of the Propositional Logic	19
References	23
Exercises	23
<b>3. The First-Order Logic</b>	
3.1 Introduction	26
3.2 Interpretations of Formulas in the First-Order Logic	30
3.3 Prenex Normal Forms in the First-Order Logic	35
3.4 Applications of the First-Order Logic	39
References	41
Exercises	41

## 4. Herbrand's Theorem

4.1	Introduction	45
4.2	Skolem Standard Forms	46
4.3	The Herbrand Universe of a Set of Clauses	51
4.4	Semantic Trees	56
4.5	Herbrand's Theorem	60
4.6	Implementation of Herbrand's Theorem	62
	References	66
	Exercises	67

## 5. The Resolution Principle

5.1	Introduction	70
5.2	The Resolution Principle for the Propositional Logic	71
5.3	Substitution and Unification	74
5.4	Unification Algorithm	77
5.5	The Resolution Principle for the First-Order Logic	80
5.6	Completeness of the Resolution Principle	83
5.7	Examples Using the Resolution Principle	86
5.8	Deletion Strategy	92
	References	97
	Exercises	97

## 6. Semantic Resolution and Lock Resolution

6.1	Introduction	100
6.2	An Informal Introduction to Semantic Resolution	101
6.3	Formal Definitions and Examples of Semantic Resolution	104
6.4	Completeness of Semantic Resolution	106
6.5	Hyperresolution and the Set-of-Support Strategy: Special Cases of Semantic Resolution	107
6.6	Semantic Resolution Using Ordered Clauses	111
6.7	Implementation of Semantic Resolution	117
6.8	Lock Resolution	120
6.9	Completeness of Lock Resolution	124
	References	125
	Exercises	126

## 7. Linear Resolution

7.1	Introduction	130
7.2	Linear Resolution	131
7.3	Input Resolution and Unit Resolution	132
7.4	Linear Resolution Using Ordered Clauses and the Information of Resolved Literals	135
7.5	Completeness of Linear Resolution	142
7.6	Linear Deduction and Tree Searching	145

7.7	Heuristics in Tree Searching	152
7.8	Estimations of Evaluation Functions	154
	References	158
	Exercises	159
<b>8.</b>	<b>The Equality Relation</b>	
8.1	Introduction	163
8.2	Unsatisfiability under Special Classes of Models	165
8.3	Paramodulation – An Inference Rule for Equality	168
8.4	Hyperparamodulation	170
8.5	Input and Unit Paramodulations	173
8.6	Linear Paramodulation	178
	References	180
	Exercises	181
<b>9.</b>	<b>Some Proof Procedures Based on Herbrand's Theorem</b>	
9.1	Introduction	184
9.2	The Prawitz Procedure	185
9.3	The V-Resolution Procedure	189
9.4	Pseudosemantic Trees	197
9.5	A Procedure for Generating Closed Pseudosemantic Trees	199
9.6	A Generalization of the Splitting Rule of Davis and Putnam	205
	References	207
	Exercises	208
<b>10.</b>	<b>Program Analysis</b>	
10.1	Introduction	210
10.2	An Informal Discussion	211
10.3	Formal Definitions of Programs	213
10.4	Logical Formulas Describing the Execution of a Program	216
10.5	Program Analysis by Resolution	217
10.6	The Termination and Response of Programs	222
10.7	The Set-of-Support Strategy and the Deduction of the Halting Clause	225
10.8	The Correctness and Equivalence of Programs	227
10.9	The Specialization of Programs	228
	References	231
	Exercises	232
<b>11.</b>	<b>Deductive Question Answering, Problem Solving, and Program Synthesis</b>	
11.1	Introduction	234
11.2	Class A Questions	236
11.3	Class B Questions	237

11.4	Class C Questions	240
11.5	Class D Questions	243
11.6	Completeness of Resolution for Deriving Answers	250
11.7	The Principles of Program Synthesis	251
11.8	Primitive Resolution and Algorithm A* (A Program-Synthesizing Algorithm)	258
11.9	The Correctness of Algorithm A*	267
11.10	The Application of Induction Axioms to Program Synthesis	271
11.11	Algorithm A (An Improved Program-Synthesizing Algorithm)	275
	References	279
	Exercises	280
<b>12.</b>	<b>Concluding Remarks</b>	<b>283</b>
	References	284
	<b>Appendix A</b>	
A.1	A Computer Program Using Unit Binary Resolution	287
A.2	Brief Comments on the Program	290
A.3	A Listing of the Program	292
A.4	Illustrations	298
	References	305
	<b>Appendix B</b>	<b>306</b>
	<b>Bibliography</b>	<b>309</b>
	<b>INDEX</b>	<b>325</b>
