

Contents

Introduction	1
Chapter I. Modern Formal Logic and Scientific Heuristic	5
I. 1. General remarks on formal deductive methods	5
I. 2. Analogs in logical calculi of principles of heuristic activity .	11
I. 3. Systematic expression of heuristic principles in logical calculi	23
I. 3. 1. Natural calculi	23
I. 3. 2. Sequential calculi	30
I. 4. The role of logical principles in scientific discovery	45
Chapter II. Criteria for Nontrivial Deducibility (Regular Deducibility)	51
II. 1. On the so-called "paradoxes" of formal deducibility	51
II. 2. Regular deducibility in the classical sentential logic	64
II. 3. A regular logical calculus	71
II. 4. Comparison of the full (classical) sentential calculus and the regular sentential calculus	77
Appendix A. The Theory of Natural Deduction from the Standpoint of Modern Formal Logic	84
1. Semantics of logical symbols. Truth tables	84
2. The concept of logical inference	92
3. Logical systems of natural deduction	100
4. Soundness, consistency and completeness of logical systems ...	141
5. Syllogistic	153
Appendix B. The Technique of Natural Deduction in Modal Logic	164
Bibliography	179
