Preface ix

A Note to the Student xv

Chapter 1 FUNDAMENTAL CONCEPTS 1

INFORMAL SET THEORY

- 1.1 Preliminary Remarks 2
- 1.2 Sets, Elements, and Subsets 4
- 1.3 An Algebra of Sets 12
- 1.4 Counting the Elements of a Set 19
- 1.5 The Inclusion-Exclusion Principle 27

METHODS OF REASONING

- 1.6 An Algebra of Statements 35
- 1.7 Theorems and Direct Proofs 45

- 1.8 Indirect Proofs **54**
- 1.9 The Natural Numbers **61**
- 1.10 Mathematical Induction **72**

Chapter 2 RELATIONS, FUNCTIONS, AND OPERATIONS 85

BASIC CONCEPTS

- 2.1 Binary Relations **86**
- 2.2 Representations of Binary Relations **92**
- 2.3 Elements of Matrix Calculations **101**
- 2.4 Equivalence Relations and Partitions **111**
- 2.5 Partial Order Relations **120**
- 2.6 Functions and Binary Operations **130**

A RECAPITULATION

- 2.7 Mathematical Structures **140**

Chapter 3 COMBINATORIAL MATHEMATICS 151

BASIC METHODS OF COUNTING

- 3.1 Combinatorial Problems **152**
- 3.2 Arrangements of Distinct Objects **160**
- 3.3 Selections from Distinct Objects **166**
- 3.4 Selections and Arrangements of Nondistinct Objects **173**
- 3.5 Selections and Arrangements with Repetition **179**
- 3.6 Distributions: Assignments **184**
- 3.7 Distributions: Arrangements **189**

FURTHER COUNTING TECHNIQUES

- 3.8 Recursive Counting **194**
- 3.9 The Concept of a Generating Function **202**
- 3.10 Computation with Generating Functions **209**

Chapter 4 GRAPHS: THEORY AND APPLICATIONS 215

- 4.1 Concepts and Terminology **216**
- 4.2 Recognizing Different Graphs **222**
- 4.3 Planar Graphs **229**
- 4.4 Euler Trails and Circuits **241**

4.5	Hamilton Paths and Circuits	249
4.6	Uses of Colors in Graphs	258
4.7	Trees	267
4.8	Search Strategies and Mazes	275
Chapter 5	GRAPHS: APPLICATIONS AND ALGORITHMS	283
5.1	Weighted Graphs	284
5.2	Matching	291
5.3	Constructing a Maximal Matching	299
5.4	Network Flow	306
5.5	Constructing a Maximal Flow	313
	References	325
	Answers to Selected Exercises	329
	Index	357
