Preface	v
List of symbols	xiv
1 The natural numbers	1
1.1 Number systems	1
1.2 Radix r representation of integers	10
1.3 Mathematical induction	21
1.4 Algorithms, programs, and correctness proofs	35
2 Introductory logic	48
2.1 Propositional logic	49
2.2 Some computing applications	61
2.3 Predicate logic	74
3 Sets, relations, and functions	85
3.1 Sets and relations	86
3.2 Functions	99
3.3 Equivalence relations	116
3.4 Cardinals; countable and uncountable sets	123
4 Algebraic topics	135
4.1 Rings and fields	136
4.2 Vector spaces	143
4.3 Linear transformations and matrices	151
4.4 Systems of equations; matrix inverses	159
4.5 Groups	174
4.6 Semigroups	185

5	Combinatorics	190
5.1	Counting principles	191
5.2	Permutation groups and applications	205
5.3	Probability	215
5.4	Ramsey theory	225
5.5	Difference equations	234
6	Partially ordered structures	252
6.1	Partially ordered sets	253
6.2	Trees	258
6.3	Boolean algebras	272
6.4	Lattices	279
7	Further logic	286
7.1	Formal proofs in propositional logic	287
7.2	Completeness of predicate logic	297
7.3	Logic programming	306
8	Graphs	318
8.1	Graphs, digraphs, and trees	319
8.2	Euler's formula and colourings of graphs	330
8.3	Transitive closure and connectedness	338
8.4	Eulerian and hamiltonian circuits	355
9	Formal machines	369
9.1	Automata and regular expressions	370
9.2	Register machines	383
9.3	Codes for programs and the insolubility of the halting problem	394
9.4	Primitive recursive functions; diagonalization	402
9.5	Turing machines	413
10	Analysis of algorithms and complexity theory	422
10.1	Rates of growth of functions	423
10.2	Algorithms for integer addition and multiplication	430
10.3	Sorting and searching by pairwise comparisons	439
10.4	Intractable problems and NP-completeness	453
11	Coding theory	465
11.1	Error-correcting codes	466
11.2	Linear codes	476
11.3	Variable-length and Huffman codes	491
11.4	Information theory	503

Appendix	516
Answers to selected exercises	530
Bibliography	571
Index	573
